

THE UNOFFICIAL
COMBINED RULEBOOK FOR

BATTLESTAR
GALACTICA

v2.0

*“Though in war, you can only get killed once. In politics, it can happen over and over.”
— President Laura Roslin*

CONTENTS

The Unofficial Combined Rulebook contains the following:

1. BATTLESTAR GALACTICA: THE BOARD GAME...6

1.1 Version and Copyright.....	6
1.2 Using These Rules.....	6
1.3 Game Overview.....	6

2. WINNING THE GAME7

2.1 Human Victory.....	7
2.1.1 Personal Goals.....	7
2.2 Cylon Victory.....	7
2.3 Cylon Leader Victory.....	7

3. CORE CONCEPTS7

3.1 Cylon Players and Human Players.....	7
3.2 Secrecy.....	7
3.2.1 Secrecy Golden Rule.....	7
3.2.2 Loyalty Cards.....	7
3.2.2.1 Conflicted Loyalties.....	7
3.2.2.2 Blind Accusations.....	8
3.2.3 Skill Cards and Skill Checks.....	8
3.2.3.1 Skill Card Abilities.....	8
3.2.4 Hand and Deck Size.....	8
3.2.5 Top Card of the Deck.....	8
3.2.6 Civilian Ships.....	8
3.2.7 Trauma Tokens.....	8
3.2.8 Revealed Cylons.....	8

4. CHARACTERS9

4.1 Character Sheets.....	9
4.2 Using Abilities.....	9
4.3 Miracle Tokens.....	9
4.3.1 Maximum Number of Miracle Tokens.....	9
4.3.1.1 The Alternate Version of Gaius Baltar.....	9
4.3.2 Cylons and Miracle Tokens.....	9
4.3.3 Gaining Miracle Tokens.....	10
4.4 Title Cards.....	10
4.4.1 The President.....	10
4.4.1.1 Quorum Cards.....	10
4.4.1.2 Succession.....	10
4.4.2 The Admiral.....	10
4.4.2.1 Nukes.....	10
4.4.2.2 Selecting Destination.....	10
4.4.2.3 Succession.....	10
4.4.3 The CAG Title.....	10
4.4.3.1 Placing Civilian Ships.....	10
4.4.3.2 Succession.....	10
4.5 Trauma Tokens.....	11
4.5.1 Discarding Trauma.....	11
4.5.2 Types of Trauma.....	11
4.5.2.1 Benevolent Trauma.....	11
4.5.2.2 Antagonistic Trauma.....	11
4.5.2.3 Disaster Trauma.....	11
4.5.3 Drawing Trauma Tokens.....	11

5. LOYALTY CARDS12

5.1 Cylon.....	12
5.2 The Mutineer.....	12
5.2.1 Becoming the Mutineer.....	12
5.2.2 Revealing as a Cylon.....	12
5.2.3 Drawing Mutiny Cards.....	12
5.2.3.1 Mutiny Cards.....	12
5.2.3.2 Mutiny Cards and the Brig.....	12
5.2.3.3 The Mutineer, Mutiny and the Brig.....	12
5.2.3.4 Cylons and Mutiny Cards.....	13
5.2.3.5 Cylon Leader and Mutiny Cards.....	13
5.3 Personal Goals.....	13
5.3.1 Revealing Personal Goals.....	13
5.3.1.1 Drawing a New Loyalty Card.....	13
5.3.2 Personal Goals in the Endgame.....	13
5.4 The Final Five.....	13
5.4.1 Resolving Final Five Cards.....	13

5.4.1.1 Looking at a Final Five Card.....	13
5.4.1.2 Final Five and Executions.....	13
5.4.2 Not a Cylon?.....	13

5.5 Sleeper Agent Phase.....13

5.5.1 Cylon player.....	13
5.5.2 The Mutineer Card.....	14
5.5.2.1 Human Players and the Mutineer.....	14
5.5.2.2 Cylon Players and the Mutineer.....	14
5.5.2.3 No Mutineer.....	14

6. CYLONS14

6.1 Revealed Cylon Players.....	14
6.1.1 Cylon Revealing.....	14
6.1.2 Revealed Cylon Players' Abilities.....	14
6.1.2.1 Ignoring Negative Effects.....	14
6.1.2.2 Character Sheet Abilities.....	14
6.1.2.3 Skill Cards.....	15
6.1.2.4 Crises.....	15
6.1.2.5 Super Crisis.....	15
6.1.3 Revealed Cylon Players' Turns.....	15
6.1.3.1 Draw Skills Step.....	15
6.1.3.2 Movement Step.....	15
6.1.3.3 Action Step.....	15
6.1.3.4 Prepare for Jump Step.....	15
6.2 Cylon Leaders.....	15
6.2.1 Playing a Cylon Leader.....	15
6.2.1.1 Skill Set.....	15
6.2.1.2 Abilities.....	15
6.2.1.3 Loyalty Cards.....	15
6.2.1.4 Ionian Nebula.....	15
6.2.2 Motive Cards.....	15
6.2.2.1 Revealing Motive Cards.....	15
6.2.3 Infiltrating.....	16
6.2.3.1 Human Player.....	16
6.2.3.2 Drawing and Playing Skill Cards.....	16
6.2.3.3 Title and Quorum Cards.....	16
6.2.3.4 Drawing Crisis Cards.....	16
6.2.3.5 Returning to the Resurrection Ship.....	16
6.2.3.6 Infiltrating and Victory.....	16
6.2.4 Boomer and Athena?.....	16

7. EXECUTION16

7.1 Execution Procedure.....	16
7.2 No More Characters Available.....	17
7.3 Executed Title Holder.....	17
7.4 No Starting location.....	17
7.5 New Characters and Allies.....	17
7.5.1 Replacing Removed Allies.....	17
7.6 Executions and Trauma.....	17
7.7 Specific Characters after an Execution.....	17

8. GAME TURN18

8.1 Game Turn Sequence.....	18
8.2 Receive Skills Step.....	18
8.2.1 Acquiring Trauma from Locations.....	18
8.2.2 Drawing Skill Cards.....	18
8.2.2.1 Multi-Skills.....	18
8.2.2.2 Human players.....	18
8.2.2.3 Revealed Cylons.....	18
8.2.2.4 Infiltrating Cylon Leader.....	18
8.2.2.5 No Skill Cards Available.....	18
8.3 Movement Step.....	18
8.3.1 Hazardous Locations.....	18
8.3.2 Moving between ships.....	18
8.3.2.1 Basestar Bridge.....	18
8.3.3 Moving During the New Caprica Phase.....	19
8.3.4 Piloting.....	19

16.3.2 Winning as a Cylon Leader	38
16.4 Eliminated Players	38
ORIGINAL GAME CREDITS	38

1. BATTLESTAR GALACTICA: THE BOARD GAME

"The Cylons were created to make life easier on the Twelve Colonies. And then the day came when the Cylons decided to kill their masters. After a long and bloody struggle, an armistice was declared and the Cylons left for another world to call their own.

Forty years later, they returned, and brought humanity to the brink of extinction. The remaining humans, led by the crew of the *Battlestar Galactica*, fled in hope of finding a new home, one known by legend as Earth.

Humanity's only hope lies in finding Earth's location while fighting off the unrelenting Cylons. But as resources run low, it is discovered that the enemy can now appear human and has infiltrated the fleet from the inside."

Based on the reimagined show of the same name, **Battlestar Galactica: The Board Game** is a highly thematic, interactive and epic game with a brilliant traitor mechanic that can be played by up to seven players.

The purpose of this **Unofficial Combined Rulebook for Battlestar Galactica: The Board Game** is to provide a cohesive set of rules for playing this great game with all expansions included in the same game.

1.1 VERSION AND COPYRIGHT

This is version **2.0** of **The Unofficial Combined Rulebook for Battlestar Galactica: The Board Game**. It was published in July 2025. It is based on the rulebooks for the base **Battlestar Galactica** game (2008), the **Pegasus** (2009), **Exodus** (2010) and **Daybreak** (2013) expansions, as well as the official **4 new ways to play** variant rules and the official **version 2.1 FAQ**.

The original game was designed by Corey Konieczka and published by Fantasy Flight Games. This unofficial version of the rules was re-written, edited and updated by Mattias Elfström with support from Kris Vanhoyland based on the original work and no permission to publish it has been obtained. This is not to be seen as a challenge to the copyright, but rather as a service to the players of this great game.

The Combined rules were play tested by Thomas Averdøl, Viktoria Averdøl, Mattias Elfström, Jeanette Utell Elfström, Claes Hohner, Rasmus Karlsson, Gustav Knopp, Tuomas

Loippo, Emelie Nordh, Per Samuelsson, Robert Simark and Martin Stegmark.

1.2 USING THESE RULES

Since these rules collect the rules of all expansions in one place, many rules that are replaced in later expansions have been removed. Most of the examples from the rulebooks have also been omitted in order to save space.

The Combined rules are written with the assumption that all options, except the Kobol, New Caprica, Ionian Nebula and Earth Objective Cards, which are still optional, will be used and that players are familiar with the complete game.

Rules which are only in effect if using the New Caprica, Ionian Nebula or Earth Objective Cards have been put over a **blue**, **green** or **orange** screen respectively.

Note that this version of the Combined Rulebook is split into this main rules document and a separate Appendix. The Components, Set Up and Variant Rules sections have all been moved to the Appendix to make it easier to refer to them.

To use these rules, be sure to refer to the section about removed and replaced components in the Appendix (rule A2.7) before starting play.

1.3 GAME OVERVIEW

Battlestar Galactica: The Board Game provides a unique gaming experience. Unlike most games where players win individually, **Battlestar Galactica** is a team game, with the added complication that which players are on which team is kept secret.

The two teams are the humans and the Cylons, and each team has a specific objective. The humans are trying to find the way to Earth, while the Cylons simply want to annihilate the human race.

Each player is secretly assigned a team at the start of the game but may sometimes switch allegiances mid game. Some players may also be assigned Personal Goals that obfuscate loyalties.

Players win or lose with the other members of their team, but must figure out who they can trust in order to lead their team to victory.

2. WINNING THE GAME

The object of the game for a given player depends on which team he belongs to. A player's team is determined by the Loyalty Cards he receives throughout the game (see rule 5, Loyalty Cards).

Details about how the End Game determines victory are found in rule 16, End Game.

2.1 HUMAN VICTORY

For the humans to win the game, they must successfully jump the fleet enough times to reach their objective as described on the selected Objective Card. Once the fleet has reached their objective (and carried out the New Caprica phase or Crossroads phase depending on which Objective Card is in play), the humans **may** win the game.

2.1.1 PERSONAL GOALS

Each unrevealed Personal Goal Loyalty Card belonging to a human player at the end of the game may affect which team wins (see rule 16.2 Personal Goals).

2.2 CYLON VICTORY

All Cylons win the game by preventing the humans from reaching their objective. They usually accomplish this goal by running the fleet out of a resource, but can also win by destroying Galactica, successfully invading Galactica with centurion boarding parties or if there are no more characters left to choose after an execution.

- **Run Out a Resource:** If at least one resource (food, fuel, morale, or population) is depleted to 0 **at the end of a player's turn**, the game immediately ends and the Cylons win. This is the most common way for the Cylons to win. Note that it is possible for the humans to reach 0 of a resource type and then increase it during the same turn without losing the game.
- **Centurion Invasion:** If at least one centurion model reaches the end of the Boarding Party track, then the crew of the Galactica are killed and the Cylons win.
- **Galactica Destroyed:** If six locations on Galactica have damage tokens on them at the same time, then Galactica is destroyed and the Cylons win.
- **No More Human Characters:** If a human is executed and there are no available characters left to be selected (which is highly unlikely when playing with all expansions combined), then the humans immediately lose the game.

2.3 CYLON LEADER VICTORY

A Cylon Leader wins along with the winning team if, at the end of the game, the Cylon Leader has no more than one Motive Card that he has not revealed and he has revealed at least two Motive Cards with an allegiance that corresponds to the winning group, either humans or Cylons (see rule 16.3 Cylon Leader Motive Cards).

3. CORE CONCEPTS

3.1 CYLON PLAYERS AND HUMAN PLAYERS

Occasionally, game elements may refer to “players”, “human players” or “Cylon players”.

The term “players” is inclusive and refers to all individuals currently playing the game.

The terms “human players” and “Cylon players” are more restrictive. The term “Cylon players” refers to revealed Cylons, but not to players who have a hidden “You Are a Cylon” Loyalty Card. The term “human players” refers to all players who are not revealed Cylons. A Cylon Leader is considered a “human player” when he is Infiltrating and a “Cylon player” when he is not Infiltrating.

3.2 SECRECY

A key element of **Battlestar Galactica: The Board Game** is the paranoia and tension surrounding the hidden Cylons. Because of this, secrecy is very important, and the following rules must be observed at all times. The reason for these restrictions is to keep hidden information secret and to protect Cylons from being discovered too easily.

3.2.1 SECRECY GOLDEN RULE

When in doubt, players may make statements that are “polar opposites”. This means that players may say if they have a “high” or “low” strength card, but may not say that they have a “pretty high”, “kinda low” or even a “medium” strength card.

3.2.2 LOYALTY CARDS

If a player is able to look at another player's loyalty cards, he may **not share specific information** about the cards (such as an ability printed on it). He may however make open accusations of the player being either a Cylon or a Human. If the player looked at multiple Loyalty Cards, he may not share the number of Cylon cards the player has, and may simply accuse him of being a Cylon (or not). When the player looks at another player's Loyalty Cards, the owner of the Loyalty Cards is allowed to know which cards are being looked at.

3.2.2.1 CONFLICTED LOYALTIES

The secrecy rules apply to the Personal Goal and Final Five Loyalty Cards as well. Players may not discuss any of the details of the text on their Loyalty Cards beyond claiming or denying their status as either a human or a Cylon. A player may suggest that he has a Personal Goal or Final Five

Loyalty Card by, for example, strongly warning others to not look at his Loyalty Cards (whether the warning is legitimate or not), but he may not explicitly state that he has a card of either type nor may he give any details of a card's effects.

3.2.2.2 BLIND ACCUSATIONS

Players may accuse each other of being Cylon operatives at any time. Although these blind accusations have no game rule effects, they can help, or confuse, the human players in their hunt to find the Cylons.

3.2.3 SKILL CARDS AND SKILL CHECKS

Players are **prohibited** from revealing the exact strength of cards in their hands. They may use vague terms such as "I can help out on this crisis a little bit," but they may not make more specific statements such as "I am playing 5 piloting." In addition, after a skill check is resolved, players may not identify which cards they played.

When adding cards to skill checks, players are forbidden from listing what card types, colors or strength they played into (or plan to play into) the skill check.

They may only share information that follows the "Secrecy Golden Rule". Common terminology that players use in this situation is "a lot" or "a little." The only instance in which a player may say that he is adding "a medium amount" to a skill check is if he plays multiple cards into the check.

Players may also say such statements as "I am playing five **low** cards to this skill check". They may do this because the number of cards being added to the skill check is open information.

3.2.3.1 SKILL CARD ABILITIES

If a player is hoping that another player has a specific Skill Card ability, he may ask other players. For example, if a player is thinking of using the "FTL Control" location during his Action step, he may ask if any players have a "Strategic Planning" Skill Card. Players may admit to having a requested card, but are **not required to**. This information should not be abused (for example, a player should not just list off all card abilities in his hand).

3.2.4 HAND AND DECK SIZE

The number of cards in each player's hand, each Skill deck, Quorum deck and the destiny deck are open information. The top card of each discard pile is open information, but players are **not allowed** to count the number of cards in it.

3.2.5 TOP CARD OF THE DECK

There are times when players receive information about the top card of a deck (such as Destination or Crisis cards). Players may not share specific information about these cards, but may classify the card as being "bad" or "good".

3.2.6 CIVILIAN SHIPS

When a player is able to look at the face of a civilian ship token, he may not reveal it or share the specific information listed on it. He may however say that it has "a lot" or "a little" resources.

3.2.7 TRAUMA TOKENS

If the Ionian Nebula Objective card is in play, the secrecy rules also apply to trauma tokens. Players may not discuss the symbols on unrevealed trauma tokens. A player may suggest that an ally token should or should not be encountered, but he must not explicitly state that a trauma token of a specific type is on the card.

3.2.8 REVEALED CYLONS

Revealed Cylon players must also follow all rules of secrecy. They may not show their hands to other players and may not say which Super Crisis Card they have in their hands.

4. CHARACTERS

4.1 CHARACTER SHEETS

Each player takes on the role of a character from the **Battlestar Galactica** universe. Each character has different strengths and weaknesses as listed on her character sheet.

Each character is also represented by a stand-up character token, which is used to track his location on the game board.

4.2 USING ABILITIES

Character sheets, Skill Cards, Loyalty Cards, Mutiny Cards and Quorum Cards can all provide abilities to players. Many abilities are prefaced with the word "Action" followed by a colon, which means that the character may only use it as his action during his Action step.

All other abilities do not require an action, and are used when specified. If multiple players wish to use an ability at the same time, the current player decides the order.

4.3 MIRACLE TOKENS

Each character has an ability that begins with the phrase, "Once per game." This ability is referred to as a **miracle ability**. At the start of the game, each player receives a miracle token that represents the ability to use his character's miracle ability.

When a player uses his character's miracle ability, he must discard his miracle token. If a player does not possess a miracle token, he **cannot use** his character's miracle ability.

4.3.1 MAXIMUM NUMBER OF MIRACLE TOKENS

A player can have only one miracle token at any time. If a player is instructed to gain a miracle token, he can do so only if he does not currently have one. If a player uses his miracle ability and then gains a miracle token, he may use his character's miracle ability again, but he must discard his miracle token again.

4.3.1.1 THE ALTERNATE VERSION OF GAIUS BALTAR

The alternate version of Gaius Baltar follows special rules for his miracle ability, "Broadcast." He can have up to three miracle tokens at any time, and he must discard three miracle tokens to use his "Broadcast" ability. If he has less than three miracle tokens on his character sheet, he can be chosen to gain a miracle token.

4.3.2 CYLONS AND MIRACLE TOKENS

When a player reveals himself as a Cylon, he must discard his miracle token. Revealed Cylon players cannot gain miracle tokens. Cylon Leaders do not discard their miracle tokens when their Infiltration ends (see rule [6.2.3.5 Returning to the Resurrection Ship](#)).

4.3.3 GAINING MIRACLE TOKENS

When a player is instructed to choose a player to gain a miracle token, he must choose a player who does not have a miracle token. If all players who can have a miracle token already have one, no player gains a miracle token. A Cylon Leader who does not have a miracle token can be chosen to gain one, even if he is not Infiltrating.

4.4 TITLE CARDS

Title Cards are assigned at the beginning of the game, but may change hands through the use of certain locations or because of certain Crisis Cards. In addition to the abilities listed below, the President, Admiral and CAG are given many important decisions to make by Crisis Cards.

4.4.1 THE PRESIDENT

The President Title Card provides powerful abilities to the player who controls it.

4.4.1.1 QUORUM CARDS

The President starts the game with one Quorum Card in her hand and can draw more using the President Title Card, or "Quorum Chamber" location. These cards provide special actions that only the President can perform and provide her a wide range of powerful abilities.

Whichever player has the President title has control over this hand of Quorum Cards. These cards are kept secret, but there is a maximum hand size of 10 Quorum Cards. At the end of any turn, if she has more than 10 Quorum Cards in her hand, she must discard Quorum Cards until she has 10.

4.4.1.2 SUCCESSION

Should the President be executed or revealed to be a Cylon, the highest player in the line of succession (including the new character replacing the executed character, if any) for that title claims the title.

If a new character is chosen after an execution that is higher on the line of succession than the current President, the new character does not automatically gain that title.

Note that if the President is in the "Brig" or "Detention", she keeps the President title and all associated abilities.

4.4.2 THE ADMIRAL

The Admiral Title Card provides powerful abilities to the player who controls it.

4.4.2.1 NUKES

The Admiral starts the game with two nuke tokens. These tokens can be devastatingly effective against basestars, but are an extremely limited resource.

4.4.2.2 SELECTING DESTINATION

The Admiral is the player who decides which destination the fleet travels to when jumping (see rule 12. Jumping the Fleet). This decision can be extremely beneficial or harmful to the human players.

4.4.2.3 SUCCESSION

Should the Admiral be executed or revealed to be a Cylon, the highest player in the line of succession (including the

new character replacing the executed character, if any) for that title claims the title. In addition, if the Admiral is placed in the "Brig", then the highest player in line that is not also in the "Brig" claims the Admiral title.

If all human players are in the "Brig", the character in the "Brig" who is highest in the line of succession becomes Admiral. If one player leaves the "Brig", he immediately becomes Admiral.

If an Admiral stripped of his title later moves out of the "Brig," he **does not automatically reclaim the title**.

If a new character is chosen after an execution that is higher on the line of succession than the current Admiral, the new character does not automatically gain that title.

Note that when the Admiral is sent to "Detention" he retains his title.

4.4.3 THE CAG TITLE

The CAG (Commander, Air Group) is the officer in charge of coordinating Galactica's pilots. The CAG Title Card provides powerful abilities to the player who controls it.

4.4.3.1 PLACING CIVILIAN SHIPS

Whenever a game effect instructs the CAG to place a civilian ship on the main game board, but does not specify in which space area, the CAG chooses which space area to place the ship in. The CAG must, if able, place the civilian ship in a space area that **does not already have a civilian ship in it**. If all space areas contain a civilian ship, the CAG may place the new civilian ship in any space area. When placing civilian ships, the CAG will want to carefully consider where Cylon ships are on the Cylon Fleet game board as that indicates where they will appear on the main game board.

4.4.3.2 SUCCESSION

Should the CAG be executed or revealed as a Cylon, the highest character in the line of succession (including the new character replacing the executed character, if any) for the CAG title claims it. In addition, if the CAG is placed in the "Brig," the highest character in line that is not also in the "Brig" claims the CAG title.

If all human players are in the "Brig", the character in the "Brig" who is highest in the line of succession becomes CAG. If one player leaves the "Brig", he immediately becomes CAG.

If a CAG stripped of his title later moves out of the "Brig," he **does not automatically reclaim the title**.

If a new character is chosen after an execution that is higher on the line of succession than the current CAG, the new character does not automatically gain that title.

Note that when the CAG is sent to "Detention" he retains his title.

If the Ionian Nebula Objective Card is in play, players will receive trauma tokens during the course of the game. These tokens represent the psychological effects on characters due to the hardships they endure (for instance, as a result of going to "Sickbay" or the "Brig").

Trauma tokens are used to influence the behavior of allies that characters may encounter. But more importantly, trauma tokens determine which player, if any, will be eliminated from the game as a result of his character being put on trial (for humans) or having his entire model line "boxed" (for Cylons) (see rule [15.4 Resolve The Trial/ Boxing the Line](#)).

Trauma tokens are mixed back into the pool of unused trauma tokens when they are discarded.

There are three types trauma tokens. See rule [15. The Ionian Nebula](#) for their effect on the Crossroads phase.

Players may receive a trauma token with a benevolent symbol on it. This represents his character developing a sense of compassion or a belief in destiny as a result of his suffering. Receiving trauma tokens with a

benevolent symbol can prove hazardous to Cylon characters.

Players may receive a trauma token with an antagonistic symbol on it. This represents his character growing more bitter and aggressive as a result of his troubles. Receiving trauma tokens with an antagonistic symbol can prove hazardous to human characters.

A player may also receive a trauma token with a disaster symbol on it, indicating some tragedy has befallen his character (see rule [4.5.3 Drawing Trauma Tokens](#)).

Any time a player takes the trauma token from a location or draws a token from the pool of unused trauma tokens, he performs the following steps in order:

1. If the trauma token has either an antagonistic symbol or a benevolent symbol, the player does not reveal it, and he places the token with any other trauma tokens he has.
2. If the trauma token has the disaster symbol on it, the player must immediately reveal the token.

A. If a human player drew this token, his

character is executed (see rule 7. Execution).

B. If a Cylon player drew this token, he draws two more trauma tokens, which he examines without revealing them. If either of these tokens is the other trauma token with a disaster symbol on it, the player must again reveal it and draw two more trauma tokens. He then places all the

trauma tokens he drew that do not have disaster symbols with any other trauma tokens he has.

3. The player returns any trauma tokens with the disaster symbol facedown to the pool of unused trauma tokens, and then randomizes the pool.

5. LOYALTY CARDS

Each player starts the game with one (or two) Loyalty Card(s). Later in the game, players receive additional Loyalty Cards (see rule 5.5 Sleeper Agent Phase), which increase their chances of being Cylons.

Loyalty Cards are kept facedown, but their owners may look at them at any time. A player may not look at other players' Loyalty Cards unless specifically allowed to do so by a card or ability.

When a player is allowed to look at a single Loyalty Card belonging to a player who has more than one, the card viewed is selected randomly.

Each Loyalty Card specifies whether the controlling player is a Cylon, is not a Cylon, or is a Mutineer.

5.1 CYLON

Important: If a player has **at least one** "You Are a Cylon" card, then he is a Cylon and ignores all "You Are Not a Cylon" cards that he may have.

5.2 THE MUTINEER

The "You Are the Mutineer" card is a unique Loyalty Card. Treat the "You Are the Mutineer" card like a "You Are Not a Cylon" Loyalty Card for purposes of determining if a player is a human or a Cylon.

While a player has the "You Are the Mutineer" card, he is referred to as the Mutineer. The Mutineer is more likely to draw Mutiny Cards, which increases his chances of being sent to the "Brig" (see rule 5.2.3.2 Mutiny Cards and the Brig).

5.2.1 BECOMING THE MUTINEER

When a human player receives the "You Are the Mutineer" card facedown at the start of the game or during the Sleeper Agent Phase, he **must immediately reveal the card** and draw an additional Loyalty Card (except in a Special Sleeper Agent Phase case - see rule 5.5.2.3 No Mutineer).

Anytime a human player receives the "You Are the Mutineer" card, he draws one Mutiny Card and gives each Title Card he has to the player whose character is highest in the order of succession for that title (excluding himself). After that, the Mutineer gains and loses Title Cards normally.

5.2.2 REVEALING AS A CYLON

If the Mutineer reveals himself as a Cylon (see rule 6.1.1 Cylon Revealing), he chooses a human player and gives that player the "You Are the Mutineer" card. Unlike the hidden Loyalty Cards, he gives this card to another player no matter how much distance has been traveled. That player must then draw one Mutiny Card and give each Title Card he has to the player whose character is highest in the order of succession for that title (excluding himself).

A player who receives the "You Are the Mutineer" card from another player does not draw an additional Loyalty Card.

5.2.3 DRAWING MUTINY CARDS

During the "Prepare for Jump" step of the Mutineer's turn, if **one or more "prepare for jump" icons are resolved, he must draw a Mutiny Card.**

5.2.3.1 MUTINY CARDS

Mutiny Cards provide special abilities that players may perform as an action. If a player is instructed to draw a Mutiny Card, he draws it from the top of the Mutiny deck and keeps it hidden from other players.

5.2.3.2 MUTINY CARDS AND THE BRIG

When a player who already has a Mutiny Card draws a second Mutiny Card, he must immediately move to the "Brig," unless specifically told not to do so (for example, if a player has been targeted by the "Press Room" location or uses the alternate version of Tom Zarek's "Abuse Power" ability). Any time a player with more than one Mutiny Card is in the "Brig," he chooses one Mutiny Card to keep and discards the rest.

While a player is in the "Brig," he may draw and play Mutiny Cards as normal. If a player in the "Brig" already has a Mutiny Card and draws a second, he must immediately choose one to keep and discard the other.

5.2.3.3 THE MUTINEER, MUTINY AND THE BRIG

The Mutineer does **not** move to the "Brig" when he draws a second Mutiny Card. Instead, when the Mutineer draws a third Mutiny Card, he must immediately move to the "Brig," unless specifically told not to do so.

Any time the Mutineer has more than two Mutiny Cards while in the "Brig," he must choose two Mutiny Cards to keep and discard the rest.

5.2.3.4 CYLONS AND MUTINY CARDS

Revealed Cylon players can never draw or play Mutiny Cards, nor can they be chosen to draw Mutiny Cards. When a hidden Cylon reveals himself, he must discard all of his Mutiny Cards.

5.2.3.5 CYLON LEADER AND MUTINY CARDS

Cylon Leaders only draw and use Mutiny Cards while they are Infiltrating (see rule 6.2.3 Infiltrating). When the action on a Mutiny Card requires a player to choose a player, he can choose an Infiltrating Cylon Leader. When a Cylon Leader ends his infiltration, he must discard any Mutiny cards he has.

5.3 PERSONAL GOALS

Individual characters may have personal motivations that exist outside of their loyalty to either humanity or the Cylons. These motivations are reflected by Personal Goal Loyalty Cards.

Note that for the purposes of determining whether a player is a human or a Cylon, the Personal Goal Loyalty Cards are treated exactly the same as "You Are Not a Cylon" Loyalty Cards.

5.3.1 REVEALING PERSONAL GOALS

Each of these Loyalty Cards has an action printed on it that allows the player who received it to reveal the card. However, he may only reveal the card if the conditions described on the card are all currently true.

5.3.1.1 DRAWING A NEW LOYALTY CARD

After a player reveals a Personal Goal Loyalty Card when the fleet has traveled six or less distance, he adds the top card from the "You Are Not a Cylon" deck to the Loyalty deck, shuffles the Loyalty deck thoroughly, and then draws a new Loyalty Card, which he examines but keeps hidden from other players. If the fleet has traveled seven or more distance after a player has revealed a Personal Goal Loyalty Card, he **does not** draw a new Loyalty Card.

5.3.2 PERSONAL GOALS IN THE ENDGAME

The Personal Goal Loyalty Cards makes winning the game more difficult for the humans (see rule 16.2 Personal Goals).

5.4 THE FINAL FIVE

Twelve models of Cylons exist, but the seven that command the Cylon Fleet never speak of the other five. Their identities are shrouded in mystery and to search for them is to put one's life in danger. If a player receives a Final Five Loyalty Card, his character is one of these models of Cylon (even though the card says "You Are Not a Cylon"; see rule 5.4.2 Not a Cylon?). The Final Five are not like other Cylons, and their allegiance in this conflict cannot be taken for granted.

Note that for the purposes of determining whether a player is a human or a Cylon, the Final Five Loyalty Cards are treated exactly the same as "You Are Not a Cylon" Loyalty Cards.

5.4.1 RESOLVING FINAL FIVE CARDS

The text on Final Five Loyalty Cards is only resolved if another player looks at the card as a result of a game effect (for

example, Gaius Baltar's Cylon Detector ability) or the card is revealed as a result of an execution.

5.4.1.1 LOOKING AT A FINAL FIVE CARD

If a player looks at a Final Five Loyalty Card belonging to someone else, he must immediately reveal it and return the card to the player who was dealt the card. The player who was dealt the card then resolves the text on the card, turns the card facedown again, and, finally, shuffles the card with any other Loyalty Cards he has.

If a player examines multiple Final Five Loyalty Cards, all effects must be applied in the order chosen by the current player (even if one player is executed).

5.4.1.2 FINAL FIVE AND EXECUTIONS

If the Final Five Loyalty Card is revealed as a result of an execution, the player who was dealt the card resolves the text on the card and then removes the card from the game. Note that, as with Crisis Cards and skill checks, revealed Cylon players are not affected by the abilities on Final Five Loyalty Cards.

5.4.2 NOT A CYLON?

If a player receives a Loyalty Card indicating that his character is one of the Final Five models of Cylon, why does the card say, "You Are Not a Cylon" on it? The answer is that the Final Five models still cling to the identities they've had while part of the fleet. Even with the knowledge of their true origin, these individuals do not necessarily join their Cylon brethren. In regard to whether a player wins with the humans or the Cylons, the Final Five Loyalty Card functions exactly the same as a normal "You Are Not a Cylon" Loyalty Card.

If a player has a Final Five Loyalty Card and a "You Are a Cylon" Loyalty Card, he is treated as any other player that has a "You Are a Cylon" Loyalty Card. Thematically, the character is one of the Final Five who has allied himself with the other Cylons.

While it may be true that a character who is one of the Final Five should thematically be resurrected in the event of an execution, if that character is not allied with the Cylons (that is, if the player with the Final Five Loyalty Card does not also have a "You Are a Cylon" card), the other Cylons will try to keep the character in his rebirthing tank indefinitely. Consequently, the character is no longer available for play. The player resolves the execution as if he were a human, losing morale and choosing a new character.

5.5 SLEEPER AGENT PHASE

Once the fleet has traveled at least four distance, each player (including revealed Cylon players, but not Cylon Leaders) is dealt one card from the top of the Loyalty deck. Cylon Leaders get two additional Motive cards.

After the new cards have been dealt allow 30 seconds for all players to read and understand their Loyalty Cards. Note that all players have to read their cards for the specified time, so as to not give away who has cards with more or less complex text.

5.5.1 CYLON PLAYER

When a Cylon player receives Loyalty Cards during the Sleeper Agent phase, he looks at all of his facedown Loyalty Cards and gives them to one human player of his choice.

5.5.2 THE MUTINEER CARD

The Following applies to the Mutineer card during the Sleeper Agent Phase:

5.5.2.1 HUMAN PLAYERS AND THE MUTINEER

If a human player (including an unrevealed Cylon) receives the "You Are the Mutineer" card, he must **immediately reveal the card** and draw an additional Loyalty Card.

5.5.2.2 CYLON PLAYERS AND THE MUTINEER

If a Cylon player receives the "You Are the Mutineer" Loyalty Card, he does not reveal it. Instead, the human player he

gives it to must immediately reveal the "You Are the Mutineer" card as if it had been dealt to him.

5.5.2.3 NO MUTINEER

After all players have received Loyalty Cards during the Sleeper Agent phase, if the "You Are the Mutineer" card was included in the Loyalty deck and was not revealed, the current player chooses a human player to draw an additional card from the Loyalty deck. If this player then reveals the "You Are the Mutineer" card, **he does not draw an additional Loyalty Card.**

6. CYLONS

In each game, there will be at least one Cylon working against the humans. The number of Cylons varies based upon the number of people playing the game.

6.1 REVEALED CYLON PLAYERS

A human player who has a "You Are a Cylon" Loyalty Card may reveal it as an action (only).

If a Cylon reveals while in the "Brig", he may not use the reveal actions on his Loyalty Card.

6.1.1 CYLON REVEALING

After a player has revealed himself as a Cylon, he performs the following steps:

1. **Discard:** The player discards down to three Skill Cards. He must also discard all of his Mutiny Cards and any remaining miracle tokens. If he has any "keep in play" Quorum Cards they are discarded.

2. **Lose Titles:** If the player had any Title Cards, they are given to a different player (see [4.4 Title Cards](#)).

3. **Resurrect:** The player moves his character token to the "Resurrection Ship" (or "Hub Destroyed") Cylon location (or to "Medical Center" during the New Caprica phase if Galactica has not yet returned to orbit). If he was piloting a viper it is returned to the Reserves.

4. **Receive Super Crisis:** The player receives one random Super Crisis Card. This card remains in his hand and may be played by activating the "Caprica" Cylon location. Super Crisis Cards are treated like normal Crisis Cards, but are immune to all character abilities that affect Crisis Cards or skill checks.

Exception: Executed Cylons do not get a Super Crisis Card at this time.

5. **Remaining Loyalty Cards:** The revealing Cylon looks at all of his facedown Loyalty Cards and gives them to **one** human player of his choice.

Exception: If Galactica has traveled seven or more distance no excess loyalty cards may be handed off.

6. **Mutineer:** If the Mutineer reveals himself as a Cylon, he chooses a human player and gives that player the "You Are the Mutineer" card. Unlike hidden Loyalty Cards, he gives this card to another player no matter how much distance has been traveled. That player must then draw one Mutiny Card and gives each Title Card he has to the player whose character is

highest in the order of succession for that title (excluding himself).

7. **End Turn:** If it is the revealing player's turn, his turn then ends and the current player token is passed to the player on his left. Note that a player who reveals himself as a Cylon does not draw a Crisis Card at the end of this turn, or any of his future turns (see rule [6.1.3 Revealed Cylon Players' Turns](#)).

6.1.2 REVEALED CYLON PLAYERS' ABILITIES

Note that Cylon Leaders follow slightly different rules; see rule [6.2 Cylon Leaders](#).

6.1.2.1 IGNORING NEGATIVE EFFECTS

A Cylon player may always ignore the negative effects of Crisis Cards and skill checks, such as discarding cards or being sent to the "Brig" or "Sickbay". They may also ignore a Crisis Card effect that would execute them (unless it specifically states to execute a Cylon player, as with the "Resistance Bombing" New Caprica Crisis Card).

6.1.2.2 CHARACTER SHEET ABILITIES

All of the abilities listed on a revealed Cylon player's character sheet are ignored. This rule means that if Sharon "Boomer" Valerii has been revealed as a Cylon before the

Sleeper Agent phase, her player is given only one Loyalty Card during the Sleeper Agent phase, rather than the two Loyalty Cards she would have received if she had not revealed her character to be a Cylon. The unused Loyalty Card remains in the Loyalty deck and may be dealt out as a result of an execution.

6.1.2.3 SKILL CARDS

Revealed Cylon players only draw two Skill Cards on their turns. A revealed Cylon player may – at his option – play **one** (and only one) Skill Card into each skill check that is resolved. Revealed Cylon players may not use actions or abilities listed on Skill Cards. They must continue to obey the hand limit rule, and discard down to 10 Skill Cards at the end of each player's turn.

6.1.2.4 CRISES

Although revealed Cylon players do not automatically draw a Crisis Card on their turn, they may draw and play a Crisis Card by using the "Caprica" Cylon location. When a revealed Cylon player draws a Crisis Card that poses a choice for the current player, that player makes the decision.

6.1.2.5 SUPER CRISIS

Super Crisis Cards are treated like normal Crisis Cards, but cannot be affected by character abilities that affect Crisis Cards or Skill checks.

6.1.3 REVEALED CYLON PLAYERS' TURNS

On a revealed Cylon player's turn (see rule **8. Game Turn** for details regarding player turns), he does not receive Skill Cards based on his skill set or draw Crisis Cards. He simply draws 2 cards, moves to any Cylon location, and then may use the action on it.

Important Note: There are no "Crisis" or "Activate Cylon Ship" steps during a revealed Cylon player's turn.

6.1.3.1 DRAW SKILLS STEP

A Cylon player may draw two Skill Cards of any type, however **each Skill Card must come from a different Skill type**. In other words, a Cylon player may not draw more than one Skill Card from any single Skill deck during his Draw Skills step.

6.1.3.2 MOVEMENT STEP

The Cylon player may move to any other Cylon location. In lieu of moving during this step, a Cylon player may use a movement action, such as those found on his Cylon Leader character sheet.

6.1.3.3 ACTION STEP

The Cylon player may perform the action listed on his current location. Revealed Cylons may **not** perform other actions, such as those found on Skill Cards or Quorum Cards. All of the abilities listed on a revealed Cylon player's character sheet are also ignored.

6.1.3.4 PREPARE FOR JUMP STEP

This step is not skipped on Cylon turns. For example, if a Cylon player activated the "Caprica" location and chose a Crisis Card that has a "prepare for jump" icon on it, the fleet marker advances one space up the Jump Preparation track (after resolving the Crisis Card).

6.2 CYLON LEADERS

Unlike other players, a Cylon Leader is known to be a Cylon from the beginning of the game. However, his true allegiance may be either human or Cylon, determined by the Motive Cards he receives throughout the game.

6.2.1 PLAYING A CYLON LEADER

Cylon Leaders are treated as revealed Cylons for all cards and effects, except as noted here.

6.2.1.1 SKILL SET

Cylon Leaders have a skill set, and must draw their Skill Cards from within their set. During set up, Cylon Leaders draw two Skill Cards, not three. **Note:** Sharon "Athena" Agathon starts the game Infiltrating (see rule **6.2.3 Infiltrating**), so she draws **three** Skill Cards at the start of the game.

6.2.1.2 ABILITIES

All abilities (including the negative ability) printed on a Cylon Leader's character sheet are always in effect. Cylon Leaders may use action abilities printed on their character sheet instead of the action listed on their current location.

6.2.1.3 LOYALTY CARDS

A Cylon Leader disregards any game effect that instructs him to add a "You Are Not a Cylon" card to the Loyalty deck and draw a Loyalty Card.

6.2.1.4 IONIAN NEBULA

If playing with the Ionian Nebula Objective, an Infiltrating Cylon Leader may encounter Ally Cards exactly the same as any human player.

6.2.2 MOTIVE CARDS

Unlike other players, Cylon Leaders need to reveal (and fulfill the conditions of) Motive Cards in order to win the game.

During set up, a player who chose to be a Cylon Leader receives two Motive Cards. During the Sleeper Agent phase, he receives **two additional Motive Cards**. Cylon Leaders do not receive Loyalty Cards.

Each Motive Card shows both an allegiance, which determines if the Cylon Leader's victory requires the humans or the Cylons to win, and the requirements that must be met in order for the Cylon Leader to reveal the card.

6.2.2.1 REVEALING MOTIVE CARDS

A Cylon Leader may reveal a Motive Card any time its requirements are currently being met. It is possible to reveal a Motive Card in the middle of resolving an action, a skill check, or a Crisis Card. At the end of the game, a Cylon Leader may reveal Motive Cards if the requirements listed on those cards are met, based upon the status of the game when it ended. He cannot reveal a Motive Card if its requirement is not currently being met, even if it was previously met.

It is possible for a Cylon Leader to reveal all four of his Motive Cards.

6.2.3 INFILTRATING

A Cylon Leader may Infiltrate the humans by activating the "Human Fleet" location. When a Cylon Leader Infiltrates, he moves from the "Human Fleet" location to any Galactica location. While Infiltrating, a Cylon Leader follows these special rules, which are summarized on the Infiltration Reference Card:

6.2.3.1 HUMAN PLAYER

While Infiltrating, a Cylon Leader is treated as a human player, except as noted below. He may move to any location available to human players, and cannot move to Cylon locations.

6.2.3.2 DRAWING AND PLAYING SKILL CARDS

An Infiltrating Cylon Leader draws one extra Skill Card from within his Skill set during his "Receive Skills" step for a total of three Skill Cards. He can use the text abilities of Skill Cards.

He can play a maximum of two Skill Cards into each Skill check. If in the "Brig", he can play a maximum of one Skill Card into each Skill check.

6.2.3.3 TITLE AND QUORUM CARDS

An Infiltrating Cylon Leader cannot become President, Admiral or CAG. He cannot be given the "Assign Vice President" Quorum Card, but may be given other Quorum Cards, such as "Assign Mission Specialist" or "Assign Arbitrator".

6.2.3.4 DRAWING CRISIS CARDS

An Infiltrating Cylon Leader draws a Crisis Card at the end of his turn.

6.2.3.5 RETURNING TO THE RESURRECTION SHIP

An Infiltrating Cylon Leader may always return to the "Resurrection Ship" (or "Hub Destroyed") as an action. If a Cylon Leader returns to the "Resurrection Ship" (or "Hub Destroyed") for any reason, he is no longer Infiltrating and must discard any Quorum Cards he has been given (without effect) and any Mutiny cards he holds.

When using this action in the "Brig" or in "Detention", he must discard all but three Skill Cards from his hand.

6.2.3.6 INFILTRATING AND VICTORY

An Infiltrating Cylon Leader still wins or loses as determined by his Motive cards; Infiltrating does not affect his allegiance.

6.2.4 BOOMER AND ATHENA?

It is possible for both Sharon "Boomer" Valerii and Sharon "Athena" Agathon to be in the same game. While the presence of Athena indicates that Boomer is not human, it does not determine whether she is loyal to Cylon objectives or not. Boomer is extremely unique, capable of both tremendous deceit and fierce loyalty. Even among the Cylons, her true nature is enigmatic.

Boomer's Loyalty Cards may indicate that she is devoted to her human peers to such an extent that she would never dare risk sending herself to the Resurrection Ship and end up being trapped in her rebirthing tank indefinitely. Of course, her Loyalty Cards may also indicate that her allegiance to her human peers is an utter fabrication and she would be welcomed by the other Cylons as a hero. It's up to the other humans to discover her true intent.

7. EXECUTION

There are various effects that will result in the **execution** of a character, most notably the "Airlock" location on Pegasus. Being executed is extremely unpleasant and should be avoided at all costs. If too many humans are executed, the fleet's morale will plummet, so players should only execute their fellows when they are sure a player is secretly a Cylon!

7.1 EXECUTION PROCEDURE

When a character is executed, the player controlling that character performs the following steps.

1. **Discard Cards:** He discards his hand of Skill and Mutiny Cards and his miracle token(s) (Quorum Cards in his hand are unaffected). He also discards any Quorum Cards played on his character (for example the "Assign Mission Specialist" Quorum card).

2. **Prove Loyalty:** If all of the player's Loyalty Cards are "You Are Not a Cylon" cards, he reveals all of them and proceeds to step 3, "Human."

If one or more of the player's Loyalty Cards is a "You Are a Cylon" card, he reveals one "You Are a Cylon" card and gives all his remaining facedown Loyalty Cards to a human player of his

choice (the player does not take the Action on his "You Are a Cylon" Loyalty Card). If his character was the Mutineer, he chooses a human player and passes him the "You Are the Mutineer" Loyalty Card faceup as he would when he reveals as a Cylon. He then proceeds to step 4, "Cylon."

If a player is a Cylon Leader, he has no Loyalty Cards to reveal, but instead proceeds to step 4, "Cylon".

3. Human:

A. Lose 1 morale.

B. The player removes his character sheet and token from the game. This character may no longer be used during the game.

C. The player discards all his Loyalty Cards.

If playing with the Ionian Nebula Objective, he also discards all of his trauma tokens.

D. The player then chooses a new character, placing that character in his starting location. He does not gain a miracle token when he chooses a new character, but may gain a miracle token later in the game through game effects. If his character was the Mutineer, his new

character immediately receives the "You Are the Mutineer" Card faceup.

He may choose any character without regard to character type (however, the player should consider the identities of known humans and suspected Cylons when selecting his character).

If playing with the Ionian Nebula Objective, he also draws three new trauma tokens (see rule 4.5.3 Drawing Trauma Tokens).

E. The player adds one card from the "You Are Not a Cylon" deck to the Loyalty deck, shuffles the Loyalty deck thoroughly, and draws one new Loyalty Card, which is kept hidden from the other players.

If the executed character was Sharon "Boomer" Valerii and the game has not yet reached the Sleeper Agent phase, the player draws an additional Loyalty Card.

4. Cylon:

A. Move to the "Resurrection Ship" (or "Hub Destroyed") Cylon location.

During the New Caprica phase and before Galactica returns, he instead moves to "Medical Center".

If playing with the Ionian Nebula Objective, he keeps his trauma tokens.

B. Follow the normal procedure for a revealed Cylon (see rule 6.1.1 Cylon Revealing), **but do not draw a Super Crisis Card**.

5. **End Turn:** If the executed character was being played by the current player, that player's turn ends, regardless of whether his character was a human or Cylon.

7.2 NO MORE CHARACTERS AVAILABLE

If a human is executed and there are no available characters left to be selected, then the humans immediately lose the game.

7.3 EXECUTED TITLE HOLDER

If the Admiral, President or CAG is executed, the title will change hands **after** the new character is selected.

7.4 NO STARTING LOCATION

If the character's normal starting location is unavailable (for example, as a result of the "Bomb on Colonial 1" Super Crisis Card), the character starts in "Sickbay" instead.

During the New Caprica phase new characters are placed at "Resistance HQ".

7.5 NEW CHARACTERS AND ALLIES

If a player chooses a character who corresponds to an ally token on the board, remove the ally token, discard the trauma token on the corresponding Ally Card, and remove the card from the game.

7.5.1 REPLACING REMOVED ALLIES

The Cylon player with the most trauma tokens draws a new Ally Card to replace the one removed from the game and places

the corresponding ally token on the appropriate location (ally tokens can be placed in locations that are already damaged).

The Cylon player then chooses one of his own trauma tokens to place facedown on the Ally Card he just drew.

If more than one Cylon player is tied for the most trauma tokens, the current player chooses which Cylon player will draw the Ally Card and place a trauma token on it. If there are no Cylon players with trauma tokens, the current player draws a card from the Ally deck, draws a random token from the pool of unused trauma tokens, and, without looking at it, places it facedown on the card.

Repeat this process until all Ally Cards remove from the game have been replaced. Once the Ally deck is depleted, no further Ally Cards may be drawn.

7.6 EXECUTIONS AND TRAUMA

If playing with the Ionian Nebula Objective the following rules apply to trauma tokens:

While resolving an execution, a player who was proven to be human discards all of his trauma tokens at the same time that he discards his Loyalty Cards.

Immediately after the player chooses a new character, he draws three trauma tokens and examines them without showing them to the other players. As at the start of the game, the player draws a replacement for any trauma token with a disaster symbol on it and returns the disaster trauma token to the pool.

A player who is proven to be a Cylon while resolving an execution keeps his trauma tokens.

7.7 SPECIFIC CHARACTERS AFTER AN EXECUTION

Some characters have unique rules that complicate their selection after an execution - see rule A2.1.1 Character Clarifications and Errata in the Appendix.

8. GAME TURN

Battlestar Galactica: The Board Game is played over a number of game turns. Starting with the first player and proceeding clockwise, players take complete game turns in order until either the human or Cylon players have won the game.

8.1 GAME TURN SEQUENCE

Each game turn consists of the following steps, carried out in order:

1. **Receive Skills Step:** See rule [8.2 Receive Skills Step](#).
2. **Movement Step:** See rule [8.3 Movement Step](#).
3. **Action Step:** See rule [8.4 Action Step](#).
4. **Crisis Step:** See rule [8.5 Crisis Step](#).
5. **Activate Cylon Ships Step (if necessary):** See rule [8.6 Activate Cylon Ships Step](#).
6. **Prepare for Jump Step (if necessary):** See rule [8.7 Prepare for Jump Step](#).
7. **Discard Step:** See rule [8.8 Discard Step](#).

After the Discard step, the current player's turn is over, and he hands the current player token clockwise to the player on his left. This player then begins his turn starting with the Receive Skills step.

The following sections explain each step of a player's turn in detail.

8.2 RECEIVE SKILLS STEP

8.2.1 ACQUIRING TRAUMA FROM LOCATIONS

If the Ionian Nebula Objective Card is in play and at the start of a player's turn, before he draws his Skill Cards, if he is located in either the "Sickbay" or the "Brig," he takes the trauma token on that location, examines it without showing it to the other players, and performs the steps outlined in [4.5.3 Drawing Trauma Tokens](#). Afterward, he replaces the trauma token by taking a token from the pool of trauma tokens, without examining it, and placing it on the location where he started his turn.

8.2.2 DRAWING SKILL CARDS

During this step, the current player draws Skill Cards according to the skill set listed on his character sheet. The player always draws the cards listed on his character sheet regardless of the number of cards already in his hand.

Exceptions: Characters in "Sickbay", "Medical center" or on the "Resurrection Ship" draw only one card.

8.2.2.1 MULTI-SKILLS

Some character sheets list multi-colored skills known as multi-skills. When a character with a multi-skill receives Skill Cards, he must first decide how many cards he will draw

from each type. The total number of cards that he draws must be equal to the number listed on his sheet.

8.2.2.2 HUMAN PLAYERS

Human players draw Skill Cards according to the skill set listed on the character sheet.

8.2.2.3 REVEALED CYLONS

Revealed Cylon players only draw two Skill Cards on their turns. A Cylon player may draw Skill Cards of any type, however **each Skill Card must come from a different Skill type**. In other words, a Cylon player may not draw more than one Skill Card from any single Skill deck during his Draw Skills step.

8.2.2.4 INFILTRATING CYLON LEADER

An Infiltrating Cylon Leader may draw one extra Skill Card (from within his Skill set) during his Receive Skills step (for a total of three cards instead of two). This additional card **may** be of a type that he has already drawn.

8.2.2.5 NO SKILL CARDS AVAILABLE

In the unlikely event that a Skill deck and discard pile have run out of cards, players will be unable to draw cards of that type until some of that type of cards have been discarded.

8.3 MOVEMENT STEP

During this step, the current player may move his character token to another location if he wishes. Human players may not move to Cylon locations, and revealed Cylon players may **only** move to Cylon locations.

8.3.1 HAZARDOUS LOCATIONS

Locations with a yellow-striped border are considered hazardous. These locations include the "Brig", "Sickbay", the "Resurrection Ship", the "Hub Destroyed", the "Medical Center" and "Detention". Players **may not move to a hazardous location** as part of their normal movement. They may only move to a hazardous location when a card or effect sends them to it.

8.3.2 MOVING BETWEEN SHIPS

If a player moves to a different ship **[or New Caprica]**, he must discard one Skill Card from his hand.

8.3.2.1 BASESTAR BRIDGE

Only revealed Cylons may

move to the "Basestar Bridge" location.

Cylon players do **not** need to discard a Skill Card when moving between the "Basestar Bridge" and the Cylon locations on the overlay.

8.3.3 MOVING DURING THE NEW CAPRICA PHASE

Until Galactica returns to orbit, no player (human or Cylon) may move to any location other than the New Caprica locations.

After Galactica returns, humans may move to any New Caprica, Galactica, or Pegasus location (provided the Pegasus has not been destroyed). A player must discard one Skill Card when moving between ships and/or the planet surface.

Similarly, after Galactica's return, Cylon players may move to any New Caprica or Cylon locations. If moving between New Caprica and the Cylon locations, the Cylon player must discard one Skill Card.

Note that during the New Caprica phase, characters may no longer move to Colonial One, even after Galactica is in orbit.

8.3.4 PILOTING

If the player's character is piloting a viper, he may move to an adjacent space area during this step, or may discard a Skill Card to move to a location on Galactica, Pegasus, Demetrius, Colonial One or the Rebel Basestar (if otherwise allowed) and return his viper to the "Reserves".

8.3.5 MOVEMENT POWERS

Movement powers are abilities granted by some cards that a player may use during the Movement step of his turn (only) in lieu of moving. A player may either move or use a Movement ability during his Movement step, but not both. He may not use more than one Movement ability per turn. Note that a player may **not** use a Movement ability when he is allowed to move during someone else's turn (such as when he has been targeted by an "Executive Order" Skill Card). Effects that prohibit the use of actions of a specific type also prohibit the use of Movement abilities of that type. For instance, while the "Hornet's Nest" Cylon attack card is in play, players cannot use actions or Movement abilities on Piloting Cards.

8.3.6 ENCOUNTERING ALLIES

If the Ionian Nebula Objective Card is in effect Galactica and Colonial One are populated with individuals who possess remarkable talents, useful knowledge, and positive traits that may prove beneficial to humanity's efforts. However they also possess bad habits, selfish motivations, and destructive elements to their personalities that may prove harmful to those who encounter them. Players may interact with these individuals by using the Ally Cards and ally tokens.

At the end of a player's Movement step, if his character is in the same location as an ally token, he **must** encounter that token's corresponding Ally Card before proceeding to his Action phase.

If more than one ally token is in the location, the player chooses one of those allies to encounter. A player may only encounter an ally on his turn and may encounter only one ally per turn.

8.3.6.1 ENCOUNTER PROCEDURE

Perform the following steps when encountering an Ally Card.

1. **Resolve Ally Card Result:** Each Ally Card lists two potential results of being encountered. The upper result described on the card is the benevolent result and the lower result is the antagonistic result.

When a player encounters an Ally Card, he first reveals the trauma token on that card. If the token has the benevolent symbol on it, he resolves the card's benevolent result. If the token has the antagonistic symbol, he resolves the card's antagonistic result. **If the token has a disaster symbol, he resolves neither result.** (Note: Revealing a trauma token with a disaster symbol when encountering an ally does **not** result in the execution of the character encountering that ally.) After revealing the trauma token, the player discards it.

2. **Discard and Draw a New Ally Card:** After resolving the Ally Card, the player removes the ally token from the board and removes the Ally card from the game. He then draws a new card from the Ally deck to replace the one he just discarded. (Once the Ally deck is depleted, no further Ally Cards may be drawn.)

Any time an Ally Card is drawn, if it represents a character (even an alternate version) who is being used by a player or who has been executed, remove that Ally Card from the game and draw a new one. If the location listed on the Ally Card is no longer in the game (for example, as a result of the "Bomb on Colonial 1" Super Crisis Card), remove the Ally card from the game and draw a new one.

The player then places the corresponding ally token in the location indicated on the card.

3. **Place a Trauma Token:** Finally, the player who drew the Ally Card chooses one of **his own** trauma tokens to place facedown on the Ally Card he just drew. If the player has no trauma tokens, he draws a random token from the pool of trauma tokens instead and, without looking at it, places it facedown on the Ally Card. (Note: The player **only** draws a token from the pool of unused trauma tokens if he does not have any trauma tokens of his own.)

8.3.6.2 TIMING OF ENCOUNTERS

Ally Cards are only encountered at the end of a player's Movement step. If a player moves to a location when it is not his Movement step (for instance, as a result of an "Executive Order" leadership card), he does **not** encounter any Ally Cards.

8.4 ACTION STEP

During this step, the current player chooses one action to perform. The action types are listed below, and are usually identified by the word "Action:" followed by an ability.

- **Activate Location:** The player may perform the action listed on his character's current location.
- **Skill Card Action:** The player may play a Skill Card from his hand to perform the action specified on the card. Note that not all Skill Cards have actions on them.
- **Character Action:** The player may perform an action listed on his character sheet. Note that only some character sheets have actions listed on them.
- **Activate his Viper:** If the player is piloting a viper, he may activate it to move or to attack a Cylon ship.

- **Title, Quorum and Mutiny Cards:** If the player has a Title, Quorum or Mutiny Card that provides him with an action, then he may perform it during this step.
- **Loyalty Card:** The character may reveal one of his "You Are a Cylon" Loyalty Cards to perform the specified action on it (unless he is in the "Brig" as specified on the card). He then follows the rules for revealed Cylon players.
- **Stop Infiltrating:** An Infiltrating Cylon Leader may always return to the "Resurrection Ship" (or "Hub Destroyed") as an action. When using this action in the "Brig" or in "Detention", he must discard all but three Skill Cards from his hand.
- **Attacking Occupation Forces and Detaining Humans on New Caprica:** A human player on New Caprica may always use an action to attack occupation forces in his location. If a Cylon player's character is in the same location as a human character and an occupation forces token, he may use an action to attempt to detain that human.
- **Do Nothing:** If the player does not wish to perform any actions, he may decide to do nothing during this step and proceed to the Crisis step.

8.4.1 ALLOWABLE ACTIONS IN THE BRIG

A player may take any actions he wishes while in the "Brig". Only his movement and participating in skill checks are restricted. He may, however, use Movement abilities.

8.4.2 ATTACKING OCCUPATION FORCES

A human player on New Caprica may always use an action to attack occupation forces in his location. To do so, he rolls a die. If the result is a 5 or higher, the attack is a success and one occupation forces token in that location is removed from the board. The human player may also discard a "Maximum Firepower" Skill Card to reroll the die. (Note that if a "Strategic Planning" Tactics Card has been played on this roll, the reroll also receives +2 to its result.)

8.4.3 DETAINING HUMANS

If a Cylon player's character is in the same location on New Caprica as a human character and an occupation forces token, he may use an action to attempt to detain that human. To do so, the Cylon player rolls a die. If the result is a 1-3, the human is moved to "Detention". If the result is 4-7, the human is moved to the "Medical Center". If the result is an 8 nothing happens.

8.5 CRISIS STEP

During this step, the current player draws the top card of the Crisis deck, reads it aloud, and then resolves it.

Exceptions: Revealed Cylons and characters in the Brig do not perform this step. If a player activates the "Bridge" location on the Demetrius game board at any point during a turn, the current player does not draw a Crisis Card during his Crisis step.

8.5.1 TYPES OF CRISES CARDS

There are two types of Crisis Cards: skill checks and events.

8.5.1.1 SKILL CHECK CRISES

These Crisis Cards list a difficulty and one or more skill types, listed as colored boxes, in the upper left corner. These cards are resolved according to the rules for skill checks (see rule 10.3 Skill Checks) and have outcomes based on whether the players pass or fail the skill check. Some of these cards give the current player, the President, the Admiral or the CAG the choice to either resolve the skill check or carry out some alternate instruction.

8.5.1.2 EVENT CRISES

Any Crisis Card that is not a skill check is an event. These crises have instructions that must be immediately followed. Some of them provide a decision for the current player, the President, the Admiral or the CAG.

8.5.2 CHOICE CRISES

When a player makes a choice on a Crisis Card, he can always choose the top or bottom section of the card, regardless of whether he will be able to fulfil the game text listed (unless the card specifically restricts this).

8.5.3 CRISIS CARDS AND THE BRIDGE

If a player activates the "Bridge" location on Demetrius at any point during a turn, the current player does not draw a Crisis Card during his Crisis step.

8.5.4 NEW CAPRICA CRISIS CARDS

During a player's Crisis step in the New Caprica phase, he draws from the New Caprica Crisis deck instead of the normal Crisis deck. New Caprica crises are resolved in the same manner as normal crises, with a number of exceptions and special rules as indicated. Any game effect that targets the Crisis Deck also affect the New Caprica Crisis Deck (for example, the "Launch Scout" Tactics Card).

8.6 ACTIVATE CYLON SHIPS STEP

Cylon ships may appear, move or attack based on the icon on the bottom left of the Crisis Card (see rule 11.5 Activating Cylon Ships). Cylon ship activations may also cause the Cylon Pursuit marker to move.

Exceptions: Revealed Cylons do not perform this step. During the New Caprica phase and until Galactica returns to orbit, all Cylon ship activation icons are ignored.

8.6.1 CYLON SHIP AND OCCUPATION FORCES ICONS

The following rules only apply if the New Caprica Objective is in play.

8.6.1.1 CYLON SHIP ACTIVATION ICONS

During the New Caprica phase and until Galactica returns to orbit, **all Cylon ship activation icons are ignored.** During

the New Caprica phase, however, occupation forces are activated by the occupation forces icon.

Note that the activate heavy raiders and centurions icons do not activate occupation forces, and occupation forces icons do not activate centurions on the Boarding Party track.

8.6.1.2 ACTIVATING OCCUPATION FORCES

Occupation forces tokens represent the Cylons' armed centurion patrols on New Caprica.

Occupation forces tokens are activated during the Activate Cylon Ships step by New Caprica Crisis Cards (see above) or by the "Occupation Authority" location. Each time they are activated, each occupation forces token is moved one space to the right following the track along the bottom of the board.

If an occupation forces token on the "Shipyards" location is activated, remove it from the game board and destroy the civilian ship on the top of the "Locked Civilian Ships" box. If the Locked Civilian Ships stack is empty, destroy the civilian ship on top of the Prepared Civilian Ships stack. If both stacks are empty, no civilian ship is destroyed.

If there are no occupation forces tokens on the game board when occupation forces are activated, place one on the "Occupation Authority" location. Note that occupation forces tokens are subject to the same rules of component limitations as all other tokens in the game. If there are not enough tokens to place more occupation forces, no new tokens are placed.

8.7 PREPARE FOR JUMP STEP

If the drawn Crisis Card has the "prepare for jump" icon on its lower right corner, then the fleet token moves one space ahead (toward the "Auto Jump" space) on the Jump Preparation track. If this causes the token to move to the "Auto Jump" space, then the fleet jumps to a new destination (see rule 12. Jumping the Fleet).

8.7.1 THE MUTINEER

During the "Prepare for Jump" step of the Mutineer's turn, if one or more "prepare for jump" icons are resolved, he must draw a Mutiny Card.

8.7.2 PREPARING FOR JUMP AND EVACUATING CIVILIAN SHIPS

The following rules only apply if the New Caprica Objective is in play.

New Caprica Crisis Cards have two icons used during the Prepare for Jump step, the evacuation icon and the prepare for jump icon.

Until Galactica returns to orbit, disregard the evacuation icon. However, use the prepare for jump icon as normal. **Once the fleet marker reaches the "Auto Jump" space of the Jump Preparation track, Galactica returns to orbit.** During the Prepare for Jump step of every subsequent New Caprica Crisis Card, when an evacuation icon appears, the current player takes one civilian ship from the top of the Prepared Civilian Ships stack and moves it to any space area with a viper launch icon. If the Prepared Civilian Ships stack is empty, ignore the evacuation icon. Once Galactica has returned to orbit, the Jump Preparation track will no longer be used and the jump icons may be ignored.

8.8 DISCARD STEP

If a player has more than 10 Skill Cards or 10 Quorum Cards in his hand at the end of **any player's turn**, he must discard cards (of his choice) until he has only 10. This hand limit does not include other cards, such as Super Crisis Cards that may be in a player's hand.

After this step, the current player's turn is over. He discards any Crisis Cards drawn this turn, and hands the current player token to the player on his left, who begins his turn (starting with the Receive Skills step).

9. LOCATIONS

Several different Locations are found around the Game Board(s). Locations provide Actions and, in some cases, limitations.

Characters use their Movement Step to move between locations (see rule 8.3 Movement Step).

9.1 HAZARDOUS LOCATIONS

As outlined in rule 8.3.1 Hazardous Locations, locations with a yellow-striped border are considered hazardous. Players **may not move to a hazardous location** using normal movement. They may only move to a hazardous location when a card or effect sends them to it.

9.2 THE BRIG

Characters in the "Brig" may not move, do not perform the Crisis Step and may only play one Skill Card in a Skill Check (see rule [10.3.1 Skill Check Procedure](#)).

9.2.1 CYLONS REVEALING IN THE BRIG

If a Cylon reveals (see rule [6.1 Revealed Cylon Players](#)) while in the "Brig", he may not use the reveal actions on his Loyalty Card.

9.2.2 TRAUMA ON THE BRIG

If a character is in the "Brig" at the start of his turn, he takes the trauma token on that location before he draws his Skill Cards, examines it without showing it to the other players, and performs the steps outlined in rule [4.5.3 Drawing Trauma Tokens](#). He then replaces the trauma token on the "Brig" by taking a token from the pool of trauma tokens, without examining it.

9.2.3 CARDS SENDING CHARACTERS TO THE BRIG

If a player is required to choose a character to send to the "Brig", he cannot choose a character that is already there. He also cannot choose a revealed Cylon player, or "Helo" before he is on the board (due to his negative ability).

9.2.4 LEAVING THE BRIG

A character passing the Skill Check to leave the Brig can move to any location on Galactica (only).

Some card effects may also allow a character to move from the "Brig", but these always specifically refer to the "Brig" (examples include the "Presidential Pardon" Quorum card, the "Make a Deal" Mutiny card and the "Dishonest Tactics" and "Rebuild Trust" Crisis cards).

9.3 SICKBAY

Characters in "Sickbay" may only draw one Skill Card during their Receive Skills Step (see rule [8.2.2 Drawing Skill Cards](#)).

9.3.1 TRAUMA ON SICKBAY

If a character is in "Sickbay" at the start of his turn, he takes the trauma token on that location before he draws his Skill Cards, examines it without showing it to the other players, and performs the steps outlined in rule [4.5.3 Drawing Trauma Tokens](#). He then replaces the trauma token on the "Brig" by taking a token from the pool of trauma tokens, without examining it.

9.3.2 CARDS SENDING CHARACTERS TO SICKBAY

If a character is in the "Brig", and a card sends him to "Sickbay" he is not moved from the "Brig". If a player is required to choose a character to send to "Sickbay", he cannot choose a character that is already there. He also cannot choose a revealed Cylon player, or "Helo" before he is on the board (due to his negative ability).

9.4 COLONIAL ONE

Certain effects require players to flip the Colonial One overlay to its destroyed side (if the "fail" result on the "Bomb on Colonial 1" Super Crisis Card is carried out, flip the Colonial One overlay to the "Colonial One Destroyed" side).

If the Colonial One overlay is flipped to the "Colonial One Destroyed" side, send all characters on Colonial One to "Sickbay".

9.5 THE RESURRECTION SHIP

Characters in the "Resurrection Ship" may only draw one Skill Card during their Receive Skills Step (see rule [8.2.2.3 Revealed Cylons](#)).

9.5.1 HUB DESTROYED

Certain effects require players to flip the Cylon locations overlay to its destroyed side.

If the Cylon Location overlay is flipped to its "Hub Destroyed" side, remove any character tokens on the overlay, flip the overlay, and then place those tokens in the same location as they were on before the overlay was flipped. If any tokens are on the "Resurrection Ship" location, players place those tokens on the "Hub Destroyed" location after flipping the Cylon Location overlay. If the Cylon Location overlay is flipped to its "destroyed" side and an effect or ability references the "Resurrection Ship" location, the "Hub Destroyed" location is used instead.

9.6 THE CYLON FLEET

When a Cylon player uses the Cylon Fleet location on the main game board to activate all Cylon ships of a certain type, it is the same as resolving the activation icon of that type (see rule [11.5 Activating Cylon Ships](#)). For example, activating raiders is the same as resolving the activate raiders icon. In this way, using the ability on the Cylon Fleet location to activate all ships may result in ships of that type being placed on the Cylon Fleet game board and advancing the Pursuit track.

When the Cylon Fleet location is used to launch 2 raiders and 1 heavy raider from each basestar, it only applies to basestars on the main game board and in no case are ships added to the Cylon Fleet game board or is the Pursuit track advanced as a result.

9.7 THE BASESTAR BRIDGE

The "Basestar Bridge" location on the Cylon Fleet game board provides Cylon players with options in their battle against humanity.

When a player activates the "Basestar Bridge" location, he chooses two of the four listed abilities to resolve, one at a time. Note that he may only resolve each ability once per activation of the location. He could not, for instance, activate the location and use the ability that compels the CAG to place a civilian ship twice.

If a Cylon player uses the Basestar Bridge location to place a basestar on the Cylon Fleet game board and both basestars are already on either the main game board or the Cylon Fleet game board, nothing happens. All basestars remain where they are.

9.8 NEW CAPRICA LOCATIONS

There are six New Caprica locations on the New Caprica game board.

9.8.1 HUMAN AND CYLON ACTION LOCATIONS

Some locations on New Caprica have actions listed as "Human Action" or "Cylon Action." Only a human player may use a "Human Action" ability. Only a Cylon player may use a "Cylon Action" ability.

9.8.2 DETENTION

Any effect that would send a character on a New Caprica location to the "Brig" sends them to "Detention" instead.

If the Admiral or CAG is sent to "Detention," they retain their Title Cards.

Cylon players cannot be sent to "Detention."

Any character ability that applies to the "Brig" applies instead to "Detention" while that character is on a New Caprica location.

9.8.2.1 QUORUM CARD EFFECTS

While the President is on a New Caprica location, any Quorum Card effects that apply to the "Brig" apply to "Detention" instead. Note that, as stated on the President Title Card, when the President plays a Quorum Card while on a New Caprica location, she rolls a die. If 3 or less, she is sent to "Detention".

9.8.2.2 CYLONS REVEALING IN DETENTION

As is the case with the "Brig", players may not use the reveal actions on Loyalty Cards while in "Detention."

9.8.3 MEDICAL CENTER

Characters in the "Medical Center" may only draw one Skill Card during their Receive Skills Step (see rule 8.2.2 Drawing Skill Cards).

Until Galactica returns to orbit, when a character would be sent to the "Resurrection Ship" (or "Hub Destroyed") (either due to revealing himself as a Cylon or being executed), he is instead sent to the "Medical Center." After Galactica returns to orbit, characters are sent to the "Resurrection Ship" (or "Hub Destroyed") as normal.

9.9 THE DEMETRIUS GAME BOARD

The Demetrius game board provides human players with opportunities to travel the extra distance needed to reach Earth. By using the locations on the Demetrius game board, human players can activate missions and interact with the Mission deck.

As with other ships, if a player moves from a viper to a location on Demetrius or between a location on the Demetrius and a location on another ship, he must discard one Skill Card from his hand.

Locations on the Demetrius game board cannot be damaged.

9.9.1 CRISIS CARDS AND THE BRIDGE

If a player activates the "Bridge" location at any point during a turn, the current player does not draw a Crisis Card during his Crisis step.

9.9.2 ACTIVATING MISSIONS

Players activate missions by using the "Bridge" location on the Demetrius game board. When a player activates a mission, he places the top card of the Mission deck faceup on the "Active Mission" space on the board. If a card is already on the "Active Mission" space on the board, players cannot activate the "Bridge" location.

Once a card has been placed on the "Active Mission" space, it remains there until the next time the fleet jumps. This prevents players from activating a new mission until after the next jump.

9.9.3 MISSION CARDS

Each Mission Card features a skill check that players must resolve when the card is revealed. If players pass the skill check, resolve the "pass" result on the card. If they do not pass the check, resolve the "fail" result on the card.

Effects or abilities that limit the number of cards that a player may contribute to a skill check (such as being in the "Brig", being a Cylon player, or Aaron Doral's "Vanity" negative ability) **do** limit the number of cards a player may contribute to skill checks on Mission Cards.

9.9.3.1 NO CHARACTER OR CARD ABILITIES

Character abilities and card abilities that affect Crisis Cards **do not** affect Mission Cards. Similarly, character abilities and card abilities that affect skill checks **do not** affect skill checks on Mission Cards.

This includes William Adama's "Command Authority" ability, Chief Tyrol's "Blind Devotion" ability and Athena's "For Love" ability and the "Investigative Committee", "Restore Order", "Declare Emergency" and "Support the People" Cards.

9.9.3.2 NO SKILL CHECK ABILITIES

Players **do not** resolve skill check abilities when resolving Mission Cards.

9.9.3.3 MISSION CARDS WITH ADDITIONAL DISTANCE

Some Mission Cards count as additional distance (see rule 12.3 Destination Cards) when the "pass" result on them is resolved. These cards are easily identified by the distance number on the

bottom of the card. If the “fail” result on one of these cards is resolved, the card is turned facedown on the “Active Mission” space and it does not count as additional distance. A card that counts as additional distance adds its distance number to the total distance traveled as soon as the “pass” result on it is resolved.

Example: The fleet has traveled eight distance when the skill check on the “Search for Home” Mission card is passed, the card counts as two additional distance immediately. Since the total distance traveled is now 10, the humans may win the next time the fleet jumps.

9.10 THE REBEL BASESTAR GAME BOARD

The Rebel Basestar game board comes into play after the skill check on the “Cylon Civil War” Mission Card is resolved. When it comes into play, place the Rebel Basestar game board in play.

Locations on the Rebel Basestar game board cannot be damaged.

9.10.1 REBEL BASESTAR ALLEGIANCE

The Rebel Basestar game board features a “Basestar Allegiance” space which is used to indicate whether the rebel basestar is allied with the humans or the Cylons.

9.10.1.1 HUMAN ALLEGIANCE

If the “pass” result on the “Cylon Civil War” Mission card is resolved, place the basestar allegiance marker on the “Basestar Allegiance” space with the **human side faceup**.

In this case, human players treat the rebel basestar as another ship, like Colonial One or Demetrius. If a player

moves from a viper to a location on the rebel basestar or between a location on the rebel basestar and a location on another ship, he must discard one Skill Card from his hand. If the basestar allegiance marker’s human side is faceup, Cylon players **cannot** move to the rebel basestar or activate its locations.

9.10.1.2 CYLON ALLEGIANCE

If the “fail” result on the “Cylon Civil War” Mission Card is resolved, place the basestar allegiance marker on the “Basestar Allegiance” space with the **Cylon side faceup**.

In this case, Cylon players can discard a Skill card to move between any location on the Cylon Location overlay and the rebel basestar. If the basestar allegiance marker’s Cylon side is faceup, human players **cannot** move to the rebel basestar or activate its locations.

9.10.2 RAIDER BAY CLARIFICATIONS

When a player activates the “Raider Bay” location, he can only activate the two raiders or the four vipers he places. He cannot activate any raiders or vipers that were placed before he activated the “Raider Bay” location.

If a player using the original version of Apollo uses his “Alert Viper Pilot” ability to pilot one of the vipers placed when the “Raider Bay” location is activated, the player who activated the “Raider Bay” location cannot activate the viper Apollo is piloting. The player using Apollo can use the action granted to him by the “Alert Viper Pilot” ability even though it interrupts the player who is activating the “Raider Bay.”

10. SKILL CARDS AND CHECKS

Skill cards are used to overcome skill checks or to provide players with special actions (and other abilities) that they can perform.

10.1 DESTINY DECK

At the start of the game, a deck of 12 Skill Cards (two of each type) is created and shuffled. Two random cards from this deck are placed into each skill check, and add an element of uncertainty.

After the last card from the Destiny deck is played, the current player creates a new one by dealing out two cards of each skill type. He then shuffles those cards thoroughly and places them on the appropriate space on the game board.

10.2 TREACHERY

All Treachery Cards have skill check abilities (see rule [10.4.2 Skill Check Abilities](#)) that threaten the human players’ chances of survival. Unless otherwise specified, Treachery Cards count

as negative strength in all skill checks. Unlike other Skill Card types, Treachery Cards are primarily used by Cylon players, although other players may be forced to use them by certain game effects.

10.2.1 DISCARDING TREACHERY AND DRAWING MUTINY CARDS

Some Treachery Cards include the phrase, “When a player chooses to discard this card, he must draw 1 Mutiny Card.” Any time a player chooses to discard one of these cards for any reason (including as a result of a Crisis Card, exceeding his hand limit of Skill Cards, or moving between ships) he must draw a Mutiny Card. He is not required to draw a Mutiny Card when the card is discarded randomly or when he plays one of these cards into a skill check.

A player **cannot** draw more than one Mutiny Card as a result of discarding these Treachery Cards in a single turn. After drawing the first Mutiny Card, he disregards the phrase, “When a player chooses to discard this card, he must draw 1 Mutiny Card,” for the rest of the turn.

10.3 SKILL CHECKS

Many Crisis Cards and game board locations require skill checks. Skill checks represent struggles and challenges that require particular skill types to overcome. They are always represented by a difficulty number (listed first) followed by the necessary skill types (colored boxes).

10.3.1 SKILL CHECK PROCEDURE

All skill checks are resolved as follows:

1. **Read Card:** The current player reads the entire card (or location) out loud to all players. Players may then discuss what they would like to do (following the guidelines under "Secrecy Rules"). If the card requires the current player, the President, or the Admiral to make a choice, he must make the decision at this time. Any choice that does not have a pass/fail effect requires players to carry out specific instructions **instead of** a making a skill check.

2. **Play from Destiny Deck:** Two cards from the Destiny deck are dealt facedown together, starting a common pile.

3. **Play Skills:** Starting with the player that is **to the left** of the current player (and ending with the current player), each player may play a number of Skill Cards from his hand facedown to the common pile:

- A character in the "Brig" may play only one Skill Card
- A character in "Detention" may play a maximum of two Skill Cards
- A revealed Cylon may play only one Skill Card
- An Infiltrator may play a maximum of two Skill Cards
- Every other character may play any number of Skill Cards

Any text on the Skill Cards played onto the pile in this manner is ignored (exception: Skill Cards with a Skill Check Ability, see rule [10.4.2 Skill Check Abilities](#)). Only the strength and types of skills on each Skill Card is relevant when played into a skill check.

4. **Shuffle and Divide Cards:** After each player has had one opportunity to play Skill Cards, the current player takes all Skill Cards from the pile and shuffles them. (The cards are shuffled so none of the players will know which players contributed which cards to the pile.) He then deals them faceup into two new piles. All cards that match a skill type (color) listed on the Crisis Card are placed in one pile, and all other cards (i.e., those that do not match) are placed in the other pile.

5. Check and resolve Skill Check Abilities and Consequences:

Determine whether any of the cards have a Skill Check Ability icon. If so, the current player resolves each card with a Skill Check Ability icon in the order of his choosing (see rule [10.4.2 Skill Check Abilities](#)). Then, if the skill check was called for by a Crisis or Super Crisis Card, determine if that card lists a "consequence" result. If so, resolve the "consequence" result listed on the card (see rule [10.4.3 Crisis Cards with a "Consequence" Result](#)). Finally, after resolving all skill abilities during a Reckless skill check follow the procedure for Reckless skill checks (see rule [10.4.4 Reckless Skill Cards](#)).

6. **Total Strength:** The total strength (upper left number) of each card pile is totaled. The total strength of the non-matching pile is subtracted from the total strength of the matching pile, giving a final strength.

7. **Determine Result:** If the final strength is **equal to or greater than** the skill check's difficulty, then the "pass" result of the skill check is carried out. Otherwise, the "fail" result is followed. All Skill Cards contributed toward the skill check are then discarded into the appropriate discard piles.

10.3.2 PARTIAL PASSES

Some skill checks have a partial pass number listed between the "pass" and "fail" results. If the skill check is not passed, but this partial pass number is equaled or exceeded, then this result is followed (instead of the "pass" or "fail" results).

10.3.3 GAME BOARD SKILL CHECKS

Five game board locations – "Admiral's Quarters", "the Brig", "the Airlock", "Resistance HQ" and "Detention" (the last two locations are only available on the New Caprica Board) – instruct the player using the location to carry out a skill check. In these cases, a skill check is resolved (following rule [10.3.1 Skill Check Procedure](#)).

10.4 SKILL CARD ABILITIES

There are a variety of Skill Card abilities, some of which are actions while others are triggered effects.

10.4.1 MOVEMENT POWERS

Movement powers are abilities that a player may use during the Movement step of his turn in lieu of moving. A player may either move **or** use a Movement ability

during his Movement step, but not both. Note that a player may **not** use a Movement ability when he is allowed to move during someone else's turn (such as when he has been targeted by an "Executive Order" Skill Card). A player may use Movement abilities while in the "Brig" or "Detention".

Movement: Take 1 Action. Only 1 "Critical Situation" or "Executive Order" card may be used per turn.

10.4.2 SKILL CHECK ABILITIES

Some Skill Cards feature a Skill Check Ability. These cards can be identified by the presence of the Skill Check Ability icon printed beside the card's strength.

The text on a Skill Card that has a Skill Check Ability icon is resolved **only** when that card is played into a skill check. The text is resolved regardless of whether the Skill Card was added to the skill check by a human player, by a Cylon player, or from the Destiny deck. **Do not resolve the text on a Skill Card played into a skill check if it does not have a Skill Check Ability icon.**

During a skill check, once all Skill Cards have been shuffled and divided into two piles (see rule [10.3.1 Skill Check Procedure](#)), determine whether any of the cards have a Skill Check Ability icon. If so, the current player resolves each card with a Skill Check Ability icon in the order of his choosing. However, do not resolve the same Skill Check Ability more than once, even if more than one copy of the same card was played into the check. (For instance, if two "Establish Network" cards were played into a skill check, double the strength of all engineering

Skill Cards played in the check, but do not double them a second time.)

When the current player resolves the skill check ability on a "Dogfight" or "Quick Thinking" Skill Card, he may have the opportunity to remove a card from the skill check. If he removes a card with a skill check ability that has **already been resolved**, the ability is unaffected. If the current player removes a Skill Card **before** its skill check ability is resolved, he does **not** resolve that ability.

10.4.3 CRISIS CARDS WITH A "CONSEQUENCE" RESULT

Some Crisis and Super Crisis Cards feature a "consequence" result (indicated by the Skill Check Ability icon) that is triggered when **at least one Skill**

Card with a Skill Check Ability icon is played into that Crisis Card's skill check.

After Skill Cards with Skill Check Ability icons are resolved during a skill check, determine if the check lists a "consequence" result. If it does, and at least 1 Skill Card with a Skill Check Ability icon was played into the check, resolve the "consequence" result. Note that the presence of a Skill Check Ability icon on a Skill Card played into a skill check triggers the "consequence" result **regardless** of whether the skill check is passed or failed.

10.4.4 RECKLESS SKILL CARDS

Reckless Skill Cards are played before any cards are added to a Skill check. They represent an effort to cut corners or make sacrifices to help resolve the challenge. **Only one**

Reckless Skill Card may be played for each Skill check.

When a "Restore Order" Card is played before a skill check, that check cannot then be made Reckless. Similarly, a "Restore Order" Card cannot be played before a skill check if that check has been made Reckless. If two or more players wish to play cards at the same time, the current player determines which player may play his card first.

When a Reckless Skill Card is played, the current Skill check is considered Reckless.

After resolving all skill abilities during a Reckless skill check, turn the top card of the Treachery deck faceup and carry out one of the following steps, based on the card's strength:

- If the card has a strength greater than "0," discard it and continue resolving the skill check. Do not resolve the card's skill check ability and do not include it when totaling strength.
- If the card has a strength of "0," turn the next card from the Treachery deck faceup as well. Resolve the skill check abilities on both of these cards, even if the ability has already been resolved during this check. Then, discard both cards and continue to resolve the skill check. Do not include these cards when totaling strength.

10.5 SKILL SUPERVISOR

Although it is technically the current player's responsibility to make sure that Skill Cards are discarded properly, many play groups prefer to assign one player the role of Skill Supervisor at the start of the game.

This player is in charge of sorting discarded Skill Cards into the appropriate discard piles. In addition, when a Skill deck runs out, this player is responsible for reshuffling the appropriate discard pile to form a new deck. Lastly, when the Destiny deck runs out, this player is in charge of creating a new Destiny deck (by collecting two of each Skill Card type and then shuffling them together).

III. COMBAT

As long as there is at least one Cylon ship on the main game board, the fleet is considered to be in combat. Cylon ships are activated at the end of each turn, based upon the Crisis Card drawn. This section describes the details of combat, including how to activate, attack, and pilot ships.

11.1 ACTIVATING VIPERS

Although Galactica does have mounted weaponry, its real military strength lies in its squadrons of single-man fighters known as vipers. The main purpose of vipers is to defend the fleet, particularly civilian ships, from Cylon ships. Vipers are usually activated by using the "Command" location.

Each viper may be activated any number of times during a player's turn, but players may not activate ships that are being piloted by another player. Vipers without piloting tokens under them are referred to as "unmanned vipers".

11.1.1 VIPER ACTIVATION OPTIONS

When a player activates a viper, he must choose **one** of the following options:

- **Launch a Viper:** The player takes a viper from the "Reserves" and places it in one of the two space areas marked with the viper launch icon.
- **Move a Viper:** The player chooses a viper that is already in a space area. He may move the viper to an adjacent space area (Mark VII vipers may move two areas). Note that vipers may not fly "over" Galactica; they may only move clockwise or counterclockwise "around" it, between directly adjacent space areas.
- **Attack with a Viper:** The player chooses a viper and a Cylon ship that are in the same space area. He then rolls one

eight-sided die to resolve an attack following the rules under "Attacking".

- **Escort Civilian Ships:** When any player activates a viper, he has the option to escort a civilian ship to safety instead of moving or attacking. When a player uses a viper activation to escort a civilian ship, he chooses one civilian ship in the viper's space area and shuffles the civilian ship back into the pile of unused civilian ships.

11.2 PILOTING VIPERS

All characters who have piloting in their skill set have the ability to personally pilot a viper. A piloted viper functions slightly differently than an unmanned viper and may not be activated using the "Command" location.

A player who wants his character to pilot a viper simply moves his character to the "Hangar Deck" location and uses the action listed there. He then launches a viper as normal (see rule 11.1.1 Viper Activation Options), places his piloting token beneath it, and removes his character token from the game board, placing it on his character sheet.

If all vipers are already in play and a player wishes to activate the "Hangar Deck" location, he may choose to move an unmanned viper from any space area to the "Reserves" so that he may pilot it.

11.2.1 MOVING AND ACTIONS WHEN PILOTING

While a character is piloting a viper, his player still takes his turn as normal. During his Movement step, he may move the viper to an adjacent space area or move his character back to a location (see rule 11.2.3 Moving from a Viper).

In addition to the normal things that a player may do during his Action step (for example, play a Skill Card), he may instead choose to activate his viper (to move again, attack or escort a civilian ship).

11.2.2 VIPER DESTRUCTION

If a character is piloting a viper when it is damaged or destroyed, his character token is placed in "Sickbay," and the viper is placed in the appropriate space (the "Damaged Vipers" area or removed from the game).

11.2.3 MOVING FROM A VIPER

When the fleet jumps, all characters who were piloting vipers are placed in the "Hangar Deck", and their vipers are returned to the "Reserves". Characters piloting Assault Raptors may choose to remain in space areas (see rule 11.3.2.4 Assault Raptors and FTL Jumps).

A player may also choose to move to Galactica, Pegasus, Demetrius, Colonial One or the Rebel Basestar (if otherwise allowed, see rule 9.10.1 Rebel Basestar Allegiance) from a viper during his Movement step. In order to do this, he must discard one Skill Card, and then he simply places his viper in the "Reserves" and his character token on the location of his choice. He may do this from any space area.

If a player is sent to "Sickbay" or the "Brig" while piloting a viper, he is moved to the appropriate location, and his viper is returned to the "Reserves".

Whenever a character moves from piloting a viper to a location, his piloting token is removed from the game board.

11.3 SHIP TYPES

11.3.1 VIPER MARK VII

Viper mark VII's function exactly like other vipers with a few exceptions. At the beginning of the game, the four viper mark VII's start the game in the "Damaged Vipers" box and may not be used until they are repaired.

11.3.1.1 COUNTS AS VIPERS

When a game effect instructs players to destroy, place, or activate vipers and both vipers and viper mark VII's are available, the current player chooses which ones to use.

11.3.1.2 MARK VII MOVEMENT

When a character is piloting a viper mark VII or activating an unmanned viper mark VII, he may move the viper two space areas instead of just one. That is, once he has moved to an adjacent space area, he may move to one additional adjacent space area if he wishes.

11.3.1.3 DAMAGE TO MARK VII'S

When a viper mark VII is attacked, it is damaged on a result of a 6 or 7 and is destroyed on a result of an 8.

11.3.2 ASSAULT RAPTORS

Assault raptors are a powerful ship type that are better suited to attack basestars than a viper, and are outfitted with both an FTL engine and a sturdier frame. The humans start the game with one assault raptor in the "Reserves". Players **cannot** choose to place this assault raptor on the board during the "Set Up Ships" step of set up. The remaining assault raptors may be added to the game through various events.

11.3.2.1 GAINING ADDITIONAL ASSAULT RAPTORS

Players can gain additional assault raptors using the "Raptor Specialist" Skill Card, the "Weapons Ready" Mutiny Card, or through the effect of the "Trial by Fire" Crisis Card. If players are instructed to destroy a raptor to build an assault raptor, a raptor from the "Reserves" must be destroyed. If there are no raptors in the "Reserves," the assault raptor cannot be built. When players gain an assault raptor, they place the plastic assault raptor in the "Reserves." Assault raptors **cannot** be risked or destroyed in place of a raptor.

11.3.2.2 COUNTS AS VIPERS

Assault raptors are treated as vipers, not raptors, for all game effects. When a game effect instructs players to choose a viper to launch, damage, destroy, place, or activate, the player taking an action at that time may choose a viper or an assault raptor to use for that game effect. If no player is taking an action, the current player chooses which ship to use. An assault raptor that was placed adjacent to the board at the start of the game and has not yet been placed on the board is **not** treated as a "destroyed viper" for other game effects.

11.3.2.3 DAMAGE TO ASSAULT RAPTORS

Unlike vipers, assault raptors cannot be damaged. When an assault raptor is attacked, it is destroyed on a die result of "7" or "8". If a player must choose a viper to be damaged

and he chooses an assault raptor, that assault raptor is destroyed.

11.3.2.4 ASSAULT RAPTORS AND FTL JUMPS

During the "Remove Ships" step of Jumping the Fleet, any player whose character is piloting an assault raptor may choose to remain in his space area. That assault raptor is not returned to the "Reserves" and the character is not moved to the "Hangar Deck". For each unmanned assault raptor in a space area during the "Remove Ships" step of Jumping the Fleet, the current player may choose to keep the assault raptor in its space area rather than returning it to the "Reserves."

11.4 CYLON FLEET

If Galactica jumps away from Cylon ships, those ships survive to continue chasing the colonial fleet, potentially catching up to them again and again.

The Cylon Fleet game board represents the staging area where the Cylons prepare their attacks on humanity. It displays the "Basestar Bridge" location, the Pursuit track, and six Cylon space areas that correspond to the six space areas surrounding Galactica on the main game board. The Cylon space area numbered "7-8" corresponds to the space area in front of Galactica, the Cylon space areas numbered "4" and "2" correspond to the two space areas on the side of Galactica with the viper launch icons, the Cylon space areas numbered "5-6" and "3" correspond to the two space areas on the side of Galactica without the viper launch icons, and the Cylon space area numbered "1" corresponds to the space area behind Galactica.

11.4.1 PLACING CYLON SHIPS ON THE CYLON FLEET GAME BOARD

11.4.1.1 PLACEMENT DIE ROLL

When a Cylon ship activation places a raider, heavy raider, or basestar on the Cylon Fleet game board, the current player rolls a die and places the ship in the Cylon space area that matches the result. This die roll **may** be modified by game effects such as a "Strategic Planning" Skill Card or Samuel T. Anders's "Longshot" ability.

11.4.1.2 OUT OF SHIPS

If a Cylon ship activation results in placing a Cylon ship on the Cylon Fleet game board, but there are no more ships of the appropriate type to be placed, the current player finds the highest-numbered space area on the Cylon Fleet game board that contains at least one of that type of ship. He then moves **all ships of all types** in that space area to the corresponding space area on the main game board.

11.4.2 PLACING CYLON SHIPS ON THE MAIN GAME BOARD

When a game effect instructs a player to place Cylon ships on the main game board (for example, the "Cylon Ambush" Destination Card or a "Launch Raiders" icon), follow these steps in order:

1. Choose the appropriate types of Cylon ships from among the ships that are on

neither the main game board nor the Cylon Fleet game board. Place these ships on the main game board as instructed.

2. If, after step 1, there are not enough ships to fulfill the instructions, take ships of the appropriate types from Cylon space areas, starting with the lowest-numbered Cylon space area and proceeding in numerical order until enough of the appropriate ships have been placed.

3. If, after step 2, there are still not enough ships to fulfill the instructions, the current player decides which ships are not placed.

11.4.3 ADVANCING THE CYLON PURSUIT MARKER

The Pursuit track displays the readiness of the Cylon Fleet to attack. The Cylon pursuit marker on the Pursuit track advances primarily when a Cylon ship is placed on the Cylon Fleet game board but may be advanced by other game effects.

11.4.3.1 PLACE CIVILIAN SHIPS

Each time the Cylon pursuit marker advances on the Pursuit track, move the Cylon pursuit marker one space to the right on the track. When the marker moves onto the space with one civilian ship printed under it, the CAG places a civilian ship on the main game board. When the marker moves onto the space with two civilian ships printed under it, the CAG places two civilian ships, one at a time, on the main game board.

11.4.3.2 AUTO ATTACK

When the Cylon pursuit marker advances to the "Auto Attack" space of the Pursuit track, move all Cylon ships from each Cylon space area on the Cylon Fleet game board to the corresponding space area on the main game board. Then move the Cylon pursuit marker to the start space of the Pursuit track.

11.5 ACTIVATING CYLON SHIPS

While in combat, the Cylon ships are activated after the Resolve Crisis step of each player's turn. Activating a ship causes it to either move or attack. Cylon ships are always activated according to the rules below, even if there is a revealed Cylon player.

Multiple Cylon ship activation icons on the same card are resolved separately in the left-to-right order printed on the card.

If multiple space areas on the main game board contain ships that need to be activated, the ships are activated one entire space area at a time in the order of the current player's choice. Each Cylon ship can only be activated once on a given player's turn.

When activated, each Cylon ship carries out **only one** of the actions listed below, taking **only** the first action that it is able to perform (in numerical priority).

11.5.1 ACTIVATE RAIDERS

1. **Attack a Viper:** The raider attacks a viper in the same space area (see rule 11.6 **Attacking**). It attacks an unmanned viper if able; otherwise it attacks a piloted viper. If two piloted vipers are in the same area, the current player chooses which one is attacked.

2. **Destroy Civilian Ship:** If there are no vipers in its area, the raider destroys one civilian ship in the same area. The current player chooses a civilian ship in the area and flips it over. The resources listed on its face are lost, and the token is removed from the game.

3. **Move:** If there are no civilian ships in the area, the raider moves one space area towards the nearest civilian ship. If several civilian ships are equidistant, it moves **clockwise** around Galactica.

4. **Attack Galactica:** If there are no civilian ships on the main game board, the raider attacks Galactica (see rule [11.6 Attacking](#)).

5. **Launch:** If there are no raiders on the main game board when raiders are activated, two raiders are launched from each basestar.

6. **Cylon Fleet:** If there are no raiders or basestars on the main game board, place 1 raider on the Cylon Fleet game board, according to rule [11.4.1 Placing Cylon Ships on the Cylon Fleet Game Board](#), and advance the Cylon pursuit marker one space on the Pursuit track.

11.5.2 LAUNCH RAIDERS

When the launch raiders icon appears:

1. **Launch Raiders:** Each basestar on the main game board launches three raiders. Whenever a raider is launched, the current player takes a ship from among those not currently on any game board (also see rule [11.4.2 Placing Cylon Ships on the Main Game Board](#)). He then places it in the launching basestar's area.

2. **Cylon Fleet:** If there are no basestars on the main game board, place 1 basestar on the Cylon Fleet game board, according to rule [11.4.1 Placing Cylon Ships on the Cylon Fleet Game Board](#), and advance the Cylon pursuit marker one space on the Pursuit track.

Damaged basestar: If the only basestar on the main game board has the disabled hangar damage token on it when a launch raiders icon is resolved, no new basestar is placed, and the Pursuit track is not advanced.

11.5.3 MOVE CENTURIONS AND ACTIVATE HEAVY RAIDERS

Heavy raiders never attack. They always move towards the nearest space area containing a viper launch icon.

Whenever there are any centurion models on the Boarding Party track and heavy raiders are activated (even by a revealed Cylon player), each centurion model moves one space towards the "Humans Lose" space.

If a centurion model reaches the end of the track, then the Cylons win the game. The human players can attempt to

destroy centurions by activating the "Armory" location on the game board.

1. **Move Heavy Raiders:** Move all heavy raiders towards the nearest space area containing a viper launch icon.

If a heavy raider starts its movement in a space with a viper launch icon, the centurions on it board Galactica, that heavy raider is removed from the game board, and a centurion model is placed on the start space of the Boarding Party track. If all four Centurions model are on the board, and a heavy raider at a viper launch icon is activated, the heavy raider is not removed from the board since a centurion cannot be placed (due to component restrictions).

2. **Launch Heavy Raiders:** If there are no heavy raiders on the main game board when heavy raiders are activated, one heavy raider is launched from each basestar on the main game board.

3. **Cylon Fleet:** If there are no heavy raiders, centurions, or basestars on the main game board, place 1 heavy raider on the Cylon Fleet game board, according to rule [11.4.1 Placing Cylon Ships on the Cylon Fleet Game Board](#), and advance the Cylon pursuit marker one space on the Pursuit track.

11.5.4 ACTIVATE CYLON BASESTARS

When a Cylon basestar is activated, the basestar attacks Galactica or Pegasus.

1. **Attack:** The current player rolls a die for each basestar on the main game board to find out if the attack damages Galactica or Pegasus (see rule [11.6 Attacking](#)).

2. **Cylon Fleet:** If there are no basestars on the main game board, place 1 basestar on the Cylon Fleet game board, according to rule [11.4.1 Placing Cylon Ships on the Cylon Fleet Game Board](#), and advance the Cylon pursuit marker one space on the Pursuit track.

Damaged basestar: If the only basestar on the main game board has the disabled weapons damage token on it when an activate basestars icon is resolved no new basestar is placed and the Pursuit track is not advanced.

11.6 ATTACKING

Whenever a ship attacks, the current player rolls an eight-sided die and consults the entry on the Attack Table that corresponds to the target of the attack (and, sometimes, the

method of the attack). Depending upon the rolled result, the target can become damaged or destroyed.

Note that players may never attack human ships with vipers or with the "Weapon's Control" location.

ATTACK TABLE	
Unit Attacked	Die Result
	3-8 = Destroyed
	7-8 = Destroyed
	7-8 = Destroyed
	5-7 = Damaged 8 = Destroyed
	6-7 = Damaged 8 = Destroyed
	7-8 = Destroyed
	Automatically Destroyed (no die roll)
	With Raider: 8 = Damaged With Basestar: 4-8 = Damaged
	With Viper: 8 = Damaged With Assault Raptor: 7-8 = Damaged With Galactica: 5-8 = Damaged
	Attack a space area with a Nuke: 1-2 = Damage a basestar twice 3-6 = Destroy a basestar 7 = Destroy a basestar and 3 raiders 8 = Destroy every ship in the space area Regardless of the result of the die roll, discard the nuke token after it has been used.

11.6.1 LAUNCHING NUKES

Although the Admiral still starts the game with two nuke tokens, it is possible, through the "Build Nuke" engineering card, to acquire a third nuke or to regain nukes after they have been used.

After launching a nuke, the nuke token is discarded. The Admiral may not have more than three nukes at one time.

When firing a nuke, the Admiral chooses a **space area** to target, rather than a basestar, and rolls a die. On a roll of 1-2, the nuke damages a basestar in that space area twice. On a

roll of 3-6, the nuke destroys a basestar in that space area. On a roll of a 7, the nuke destroys a basestar and three raiders in that space area. On a roll of an 8, every ship in that space area is destroyed, including raiders, heavy raiders, basestars, vipers, and civilian ships. In cases where a 7 or lower was rolled and more than one basestar is in a space area, the Admiral chooses which basestar to damage or destroy. In cases where a 7 or lower is rolled and there are no ships of the appropriate type in the space area to damage or destroy, the nuke has no effect, although the nuke token is still discarded by the Admiral.

11.7 DAMAGE

11.7.1 DAMAGE TO SMALL SHIPS

Depending upon the ship type, different things happen if a ship is damaged or destroyed.

Whenever a ship (or other component) is removed from the game, it may not be used for the remainder of the game.

11.7.1.1 CYLON SHIPS

When a Cylon ship is destroyed, it is removed from the game board, but may return later in the game.

11.7.1.2 VIPERS, ASSAULT RAPTORS AND RAPTORS

When a viper is damaged, it is placed in the "Damaged Viper" box of the game board. A viper in this box may not be launched or used until it has been repaired (usually by an engineering card).

When a viper, assault raptor or raptor is destroyed, **it is removed from the game.**

11.7.1.3 CIVILIAN SHIPS

When a civilian ship is destroyed, it is turned faceup. The fleet then loses the resources (usually population) listed on the token. **The token is then removed from the game.**

11.7.2 DAMAGE TO GALACTICA OR PEGASUS

When Galactica or Pegasus is damaged, the current player draws a random damage token of the appropriate ship type. Their effects vary depending on the token type. Each time Galactica would be damaged, the current player may choose to draw a Pegasus damage token instead of a Galactica damage token. These tokens behave identically to Galactica damage tokens, except that they depict Pegasus locations.

11.7.2.1 LOST RESOURCE

When drawn, the fleet loses the listed resource. **This token is then removed from the game.**

11.7.2.2 DAMAGE LOCATION

When drawn, this token is placed on the matching location. All characters in this location are moved to "Sickbay."

Characters may move into a damaged location, but may not use the action listed on it (until repaired by an engineering card).

If the "FTL Control" location is damaged, the fleet marker can still advance and the fleet can still Auto Jump, however.

When a damaged location is repaired, return the damage token to the pile of unused damage tokens and randomize them.

11.7.2.3 DAMAGED ALLY LOCATIONS

If a location containing an ally token is damaged or removed from play, remove all ally tokens in that location from the game board, discard the trauma tokens on the corresponding Ally Cards, and remove those cards from the game. Replace the removed allies as described in rule 7.5.1 Replacing Removed Allies.

11.7.2.4 DESTRUCTION OF PEGASUS

If all four Pegasus locations have a damage token on them at the same time, Pegasus is destroyed. Move all characters on Pegasus to "Sickbay" and remove the Pegasus game board from the game.

11.7.2.5 DESTRUCTION OF GALACTICA

If six locations on Galactica have damage tokens at the same time, then the Cylons win the game.

11.7.3 DAMAGE TO BASESTAR

When a basestar is damaged, the current player draws a random basestar damage token. Their effects vary depending on the token.

- **Critical Hit:** When drawn, this token is placed on the basestar. While it remains, it counts as two damage tokens (it takes three damage tokens to destroy a basestar).
- **Disabled Hangar:** When drawn, this token is placed on the basestar. While it remains, the basestar may not launch raiders or heavy raiders.
- **Disabled Weapons:** When drawn, this token is placed on the basestar. While it remains, the basestar may not attack Galactica.
- **Structural Damage:** When drawn, this token is placed on the basestar. While it remains, all attacks against the basestar gain +2 to their die rolls.

11.7.3.1 DESTRUCTION OF BASESTAR

If a basestar receives three or more damage tokens, then it is destroyed and is removed from the game board. All damage tokens on it are returned and randomly mixed into the pile of unused damage tokens.

11.7.3.2 OTHER EFFECTS DESTROYING A BASESTAR

If a game effect instructs you to destroy a basestar, you remove the basestar without drawing any damage tokens.

11.7.3.3 ALTERNATE BASESTAR DAMAGE TOKENS

The alternate basestar damage tokens replace the basestar damage tokens if playing with the Ionian Nebula Objective Card. The critical hit, disabled hangar, disabled weapons, and structural damage tokens each function as described above. Additionally, there are two new types of basestar damage tokens, detailed below:

- **Collateral Damage:** When drawn, destroy up to three raiders in the same space area as this basestar. Place this token on the basestar. While the token remains, it counts as one damage token.
- **Damage to Personnel:** When drawn, each Cylon player draws two trauma tokens. Place this token on the basestar. While the token remains, it counts as one damage token.

12. JUMPING THE FLEET

In **Battlestar Galactica**, moving ships at faster-than-light (FTL) speed is referred to as "jumping."

12.1 JUMPING TO A NEW DESTINATION

The fleet jumps to a new destination in one of two ways:

- **Auto Jump:** If the fleet token is moved to the "Auto Jump" space of the Jump Preparation track (see rule 8.7 Prepare for Jump Step).
- **FTL Control Jump:** If a player activates the "FTL Control" location. If the fleet jumps this way, then some population may be lost (see rule 12.2 FTL Control Jump).

Whenever the fleet jumps, the Admiral draws Destination Cards to determine where the fleet jumps to.

12.1.1 NEW DESTINATION PROCEDURE

To choose the destination, the Admiral performs the following steps:

1. **Move Vipers:** When the fleet jumps, return any vipers in space areas to the "Reserves" and move any character who was piloting a viper to the "Hangar Deck" location. Any player whose character is piloting an assault raptor may however choose to remain in his space area and the current player may choose to keep any unmanned assault raptor in its space area rather than returning it to the "Reserves."

Do not remove any civilian ships from the main game board.

Each civilian ship remains in the same space area it was in when the fleet jumped. Civilian ships are only removed from the main game board when destroyed, escorted using a viper activation, or as a result of a game effect that specifically

instructs players to remove civilian ships from the main game board.

2. Move Cylon Ships: Move any Cylon ships in space areas on the main game board to the corresponding Cylon space areas on the Cylon Fleet game board (see rule [11.4 Cylon Fleet](#)).

All basestar damage tokens on basestars are removed and randomly mixed into the pile of unused damage tokens.

Any centurion models on the Boarding Party track remain in play when the fleet jumps.

3. Remove Mission Cards: Remove the card on the "Active Mission" space and do one of the following:

- If the card was **faceup** and **has a distance number** on it, place the card next to the Earth Objective Card.
- If the card was **faceup** and **does not have a distance number** on it, place the card faceup in the discard pile.
- If the card was **facedown**, reshuffle the card back into the Mission deck.

4. Choose Destination: The Admiral draws two cards from the Destination deck, chooses one, and places the other on the bottom of the deck without showing it to the other players.

5. Follow Instructions: The Admiral places the chosen card faceup next to the Objective Card and follows any instructions on the Destination Card.

6. Objective Instructions: If the previous step causes the total distance on Destination Cards placed adjacent to the Objective Card to equal or exceed the given distances for the first time, then follow the instructions on the Objective Card.

7. Reset Jump Preparation Track: Move the fleet token to the start space of the Jump Preparation track.

12.2 FTL CONTROL JUMP

If the fleet marker has moved to one of the blue spaces of the Jump Preparation track, players may force the fleet to jump using the "FTL Control" location. If the fleet jumps due to someone activating this location, there is a chance that the fleet will lose some population.

The current player rolls the die, and if a **"6" or lower** is rolled, then a number of population is lost equal to the number listed on the current space of the Jump Preparation track. Players then follow all steps for "Jumping the Fleet".

12.3 DESTINATION CARDS

Each Destination Card has two important pieces of information on it. In the center of the card are the special effects of traveling to this destination. These effects usually include losing fuel or other resources and/or following special instructions. The effects of a Destination Card are immediately followed when the fleet travels to that destination.

The bottom of each Destination Card lists a distance number. After the special effects of the card are followed, it is placed faceup next to the Objective Card, so that the total distance the fleet has traveled can easily be seen.

12.4 THE OBJECTIVE CARD

The Objective Card lists important information, including when additional Loyalty Cards are dealt out and how the humans can win the game. When the fleet equals or exceeds a listed distance total for the first time, the players perform the following instructions. These instructions are also summarized on the Objective Card.

12.4.1 SLEEPER AGENT PHASE

When **four or more units of distance** have been traveled, the remaining Loyalty Cards are dealt out (see rule [5.5 Sleeper Agent Phase](#)).

12.4.2 REACH KOBOL

If the Kobol Objective Card is in play, after **eight or more units of distance** have been traveled, the humans are only one jump away from winning the game. The next time the humans jump, they do not draw a Destination Card; instead, the End Game determines the winners (see rule [16. End game](#)).

12.4.3 REACH NEW CAPRICA

If the New Caprica Objective Card is in play, after **seven or more units of distance** have been traveled, the game moves to the New Caprica phase (see rule [14. New Caprica](#)). After Galactica has returned and made its final jump, the End Game determines the winners (see rule [16. End game](#)).

12.4.4 REACH IONIAN NEBULA

If the Ionian Nebula Objective Card is in play, after **eight or more units of distance** have been traveled, the game moves to the Crossroads phase (see rule [15.1 The Crossroads Phase](#)). Once the game has resumed after the Crossroads phase, the next time the humans jump, the End Game determines the winners (see rule [16. End game](#)).

12.4.5 REACH EARTH

If the Earth Objective Card is in play, after **ten or more units of distance** have been traveled, the next time the humans jump, they do not draw a Destination Card; instead, the End Game determines the winners (see rule [16. End game](#)).

13. MISCELLANEOUS RULES

13.1 MODIFYING DIE ROLLS

After all modifications to a die roll have been calculated, any number greater than an "8" is treated as an "8" and any number less than a "1" is treated as a "1."

13.2 LOSING AND GAINING RESOURCES

The four resources (fuel, food, morale, and population) are all vital to the survival of humanity. These resources are usually lost due to Crisis Cards, civilian ships being destroyed, or Galactica damage tokens.

Crisis cards list resource loss as text, for example "- 1 population," while tokens list resource loss as a number of red icons. For example, one red population icon means the same as "- 1 population." The list of resource icons is found on the game board.

If there is a tie among resources when players are instructed to reduce or increase the highest or lowest resource, the current player chooses one of the tied resources to reduce or increase.

Whenever a resource is lost for any reason, the appropriate resource dial is adjusted to represent the new total. The red color on the resource wheels tells players when a resource is half (or less) full.

13.2.1 RESOURCE MAXIMUMS

Although resources can sometimes be increased by cards, they can never be raised higher than 15.

13.2.2 RESOURCE MINIMUMS

A resource can never fall below zero.¹

13.3 TIMING

If two or more players wish to play a card or use an ability at the same time (such as two players wishing to use different Skill Card abilities before resolving a skill check), the current player decides which player plays his card or uses his ability first. If a card cannot be played as a result (for example, if two players attempt to play a "Strategic Planning" Tactics Card), it is returned to the hand of the player who tried to play it.

13.4 COMPONENT LIMITATIONS

Whenever a deck of cards runs out, the current player shuffles the appropriate discard pile to form a new deck. This includes Skill Cards, Quorum Cards, Mutiny Cards, Crisis Cards, Super Crisis Cards, New Caprica Crisis Cards and Mission Cards.

Tokens and plastic ships are limited to the quantity provided, and can run out during the game. The current player always

decides the order in which a component type is placed, and if there are not enough, he decides which ones are not placed.

13.5 RAPTORS AND RISKING

Raptors are not used during combat and are usually "risked" according to the instructions on Skill and Destination Cards to receive particular rewards. In order to risk a ship, there must be at least one of the required type of ship in the "Reserves." These cards usually instruct the player to roll a die and receive a reward if he reaches a specified number.

If the die roll is less than the number, then the risked ships listed on the card are destroyed, and no reward is gained.

13.6 DESTROYING CIVILIAN SHIPS

When a player is instructed to "draw a civilian ship to destroy" (such as by Helena Cain's Blind Jump ability or by the "Misjump" Destination Card), draw a random civilian ship token from the tokens **not currently on the board** and destroy it. If all remaining civilian ships are currently on the board, the current player may choose any civilian ship on the board to destroy.

¹ This was clarified by the designer of the game on BGG <https://boardgamegeek.com/thread/3285837/can-resources-be-reduced-below-zero-seeking-citati/page/3>

14. NEW CAPRICA

When playing with the New Caprica Objective Card, the game will enter the New Caprica phase after the humans travel seven or more units of distance. When this occurs, the game changes in a variety of ways, as detailed in this section.

Thematically, when the humans reach New Caprica, they settle on the planet and attempt to start new lives, safe from the Cylons. Unfortunately for them, the Cylons discover their settlement. New Caprica is invaded and occupied, and the Galactica and Pegasus (assuming she's still spaceworthy) are forced to flee.

14.1 THE NEW CAPRICA PHASE

During the New Caprica phase, Crisis Cards are drawn from a unique Crisis deck; the New Caprica Crisis deck. Humans and Cylons may both move about the New Caprica board as the Cylons attempt to live in “harmony” with humanity.

The ultimate goal for the humans during this phase is to protect themselves from the Cylon forces and prepare for Galactica's return. Once the fleet marker has reached the "Auto Jump" space of the Jump Preparation track, Galactica reappears in orbit over New Caprica.

In order for the humans to win the game, the Admiral must order a final jump with Galactica and leave New Caprica. Any human players left behind are executed and any civilian ships left behind are destroyed. If these losses reduce one or more of the humans' resources to zero, the Cylons have won. If they do not, the humans win.

14.2 SET UP NEW CAPRICA

At the beginning of the New Caprica phase, perform the following in order:

1. **Place New Caprica Game Board:** Place the New Caprica game board to the right of the core game board.
2. **Main Game Board:** Leave any centurion models on the Boarding Party track in their current position, as well as any Cylon ships placed in a space area by the Destination Card. These will remain in place and are unaffected by any game mechanic until Galactica returns to orbit.
3. **Move Humans:** All human players move their characters to "Resistance HQ". Return all assault raptors in space areas to the "Reserves". If the "Colonial One Destroyed" side of the Colonial One overlay is not faceup, flip the overlay.

4. **Move Cylons:** Cylon players move their characters to "Occupation Authority."

5. **Move Civilians:** Place all (non-destroyed) civilian ships, including any in space areas, in a stack on the “Locked Civilian Ships” box next to the “Shipyard” location.

- 6. Place the New Caprica Crisis Deck:** Shuffle the New Caprica Crisis deck and place it by the game board. Return the normal Crisis deck to the box. It will not be used during the remainder of the game.

- 7. Reset Fleet Marker:** Place the fleet marker on the “Start” space of the Jump Preparation track.

14.3 PREPARED AND LOCKED CIVILIAN SHIPS

14.3.1 PREPARING CIVILIAN SHIPS

The New Caprica phase starts with the civilian ships stacked on the "Locked Civilian Ships" box. When a player prepares a civilian ship, he moves the ship on the top of the "Locked Civilian Ship" stack to the **bottom** of the "Prepared Civilian Ships" stack.

14.3.2 EVACUATING CIVILIAN SHIPS

Ships stacked on the “Prepared Civilians Ships” box may only be evacuated (moved to a space area with a viper launch icon on the Galactica board) once Galactica has returned to orbit.

From that point on, any time a civilian ship is evacuated, the current player moves the top ship on the Prepared Civilian Ships stack to a space area with a viper launch icon.

14.3.3 LEAVING NEW CAPRICA

When the Admiral ends the game (by using an action to order a final jump with Galactica and leave New Caprica - see [rule 14.6 Admiral Orders Galactica to Leave](#)), any civilian ships in either the Prepared Civilian Ships box or the "Locked Civilian Ships" box are destroyed.

14.4 BEFORE GALACTICA RETURNS TO ORBIT

During the New Caprica phase, ignore any effect that would place, destroy, or move ships in any space area around Galactica or centurions on the Boarding Party track, until the Galactica returns to orbit (see rule [14.5 Galactica Returns to Orbit](#)). Additionally, locations on Galactica and Pegasus may neither be damaged nor repaired until Galactica returns to

orbit. After Galactica returns, however, this rule is suspended and the normal rules again apply.

14.4.1 CYLON SHIP ACTIVATIONS

Until Galactica returns to orbit, **all Cylon ship activation icons are ignored**. Occupation forces are activated by the occupation forces icon.

14.4.2 EVACUATION ICONS

Until Galactica returns to orbit, disregard the evacuation icon.

14.4.3 MOVING BETWEEN NEW CAPRICA AND SHIP LOCATIONS

Until Galactica returns to orbit, no player (human or Cylon) may move to any location other than the New Caprica locations.

14.4.4 PLACING CIVILIAN SHIPS

Once the New Caprica phase has begun, players cannot place civilian ships in space areas until Galactica returns to orbit.

14.4.5 RISKING RAPTORS

Raptors may still be risked as normal throughout the New Caprica phase.

14.4.6 ATTACKING OCCUPATION FORCES AND DETAINING HUMANS

These are actions that can always be attempted on New Caprica (see rule [8.4 Action Step](#)).

14.4.7 NEW CHARACTER STARTING LOCATION ON NEW CAPRICA

If a new character is introduced to the game as a result of an execution before Galactica returns to orbit, use the "Resistance HQ" location instead of the character's normal starting location.

14.5 GALACTICA RETURNS TO ORBIT

Once the fleet marker has reached the "Auto Jump" space of the Jump Preparation track, Galactica jumps into orbit and the final evacuation of New Caprica begins.

Once Galactica reaches orbit, do the following, in order:

1. Place a basestar and four raiders in each of the two space areas above Galactica (adjacent to its starboard side). Note: Be sure to use the steps outlined in rule [11.4.2 Placing Cylon Ships on the Main Game Board](#).
2. Launch 2 vipers into **each** space area containing a viper launch icon.

14.5.1 CYLON SHIP ACTIVATIONS

From this point forward, Cylon ship activation icons are no longer ignored.

14.5.2 EVACUATION ICONS

When an evacuation icon is revealed, the current player moves one civilian ship from the Prepared Civilian Ships stack to any space area with a viper launch icon.

14.5.3 MOVING BETWEEN NEW CAPRICA AND SHIP LOCATIONS

Human players may now move between New Caprica and Galactica or Pegasus (but not Colonial One) by discarding one Skill Card. Cylon players may move between New Caprica and the Cylon locations by discarding one Skill Card.

14.5.4 PLACING CIVILIAN SHIPS

After Galactica returns, players can place civilian ships in space areas, but **cannot** move them from the Locked Civilian Ships stack or Prepared Civilian Ships stack unless allowed to by a game effect.

The CAG does not place civilian ships on the main game board when the Cylon Pursuit Marker moves onto a space with one or more civilian ships on it.

14.6 ADMIRAL ORDERS GALACTICA TO LEAVE

At any point after Galactica's return, the Admiral may, as an action, order Galactica to leave.

Once the Admiral has ordered Galactica to leave, destroy all civilian ships still on New Caprica (see rule [11.7.1.3 Civilian Ships](#)) and execute any human players still on a New Caprica location (see rule [7. Execution](#)). This ends the game (see rule [16. End game](#)).

15. THE IONIAN NEBULA

During their journey to the Ionian Nebula, characters become burdened by trauma as a result of their difficult experiences. In facing their challenges, they may be helped or hindered by the many allies found in the fleet. But, in the end, each character must ultimately face his own crossroads and prove his worth.

The Ionian Nebula Objective uses trauma tokens, ally tokens, alternate basestar damage tokens, Ally Cards, Crossroads Cards, and the Ionian Nebula Objective Card.

When playing with the Ionian Nebula Objective Card, the game enters the Crossroads phase after the humans travel eight or more units of distance.

15.1 THE CROSSROADS PHASE

The Crossroads phase represents a pivotal moment in the search for Earth. As the Cylons attack, each character must face an important decision.

As soon as the Crossroads phase begins, the current player's turn is interrupted. Players then complete the following steps:

1. Set Up Battle of the Ionian Nebula
2. Draw and Resolve Crossroads Cards
3. Resolve "The Trial/Boxing the Line"

The following sections describe these steps in more detail. After resolving these steps, the current player's turn resumes.

15.2 SET UP BATTLE OF THE IONIAN NEBULA

Once Galactica jumps to the nebula, it encounters basestars and raiders waiting to attack. The ensuing battle is later known as the Battle of the Ionian Nebula.

In this step, the current player does the following in order:

1. Place a basestar and four raiders in each of the two space areas above Galactica (as shown above). Note: Be sure to use the steps outlined in rule 11.4.2 Placing Cylon Ships on the Main Game Board.

2. Launch two vipers into each space area containing a viper launch icon.

3. Move the fleet marker to the start space of the Jump Preparation track. Note that this replaces the Reset Jump Preparation Track step of "Jumping the Fleet".

15.3 DRAW AND RESOLVE CROSSROADS CARDS

Arriving at the Ionian Nebula, each character faces a pivotal moment. The nature of this moment varies, but for each character, it is an opportunity to potentially overcome his past or to have a major impact on the search for Earth.

15.3.1 UNREVEALED CYLONS

Unrevealed Cylons are still treated as human players, even during the resolution of "The Trial/Boxing the Line." If an unrevealed Cylon is eliminated as a result of resolving "The Trial/Boxing the Line," he follows the normal steps for execution, including revealing one "You Are a Cylon" card, but the character is not moved to the Resurrection Ship. The player removes his character sheet and token from the game, no longer takes his turn, and has lost the game. It would seem neither the humans nor the Cylons wanted him around.

15.3.2 CYLON LEADERS

At the start of the Crossroads phase, if a Cylon Leader is currently Infiltrating, he resolves "The Trial/Boxing the Line" as if he were a human. If he is not Infiltrating, he resolves "The Trial/Boxing the Line" as a Cylon.

15.3.3 DEAL CROSSROADS CARDS

After placing ships for the Battle of the Ionian Nebula and resetting the fleet marker, the current player shuffles the Crossroads deck and deals one card facedown to each player. Each Crossroads Card features two results, one for a trauma token with a benevolent symbol and one for a trauma token with an antagonistic symbol.

After secretly looking at his Crossroads Card, each player places it facedown in front of himself and chooses one of his trauma tokens to play facedown next to his Crossroads Card. This token indicates which result on the card will be resolved. If a player has no trauma tokens, he may choose either of the two results to resolve when his card is revealed.

15.3.4 REVEAL CROSSROADS CARDS

After all players who have trauma tokens have played one facedown next to their Crossroads Card, the current player reveals his Crossroads Card and the trauma token he placed next to it. He then resolves the result that matches the trauma

token he played (or the result of his choosing if he had no trauma token to play). Play proceeds clockwise, and each subsequent player reveals both his Crossroads Card and trauma token and then resolves the appropriate result.

15.3.5 EXECUTIONS

If at any point during this step a character is executed, the execution is resolved fully. However, the player does not discard his Crossroads Card or the trauma token he played next to it (his Crossroads Card will still be resolved in turn). Note that being executed while resolving Crossroads Cards is not the same as being eliminated.

15.4 RESOLVE THE TRIAL/ BOXING THE LINE

After each character has faced his crossroads, his peers must judge whether that character, either Cylon or human, still belongs among his own kind.

If not, that character is deemed unworthy of continuing in the struggle to find Earth. In the case of a human, this judgement means he has been found guilty by his peers and sentenced to death. For a Cylon, this judgement means having his entire model line "boxed" and kept in cold storage forever.

15.4.1 THE TRIAL/BOXING THE LINE PROCEDURE

To resolve this step, players do the following:

1. **Remove Cards and Tokens:** After all Crossroads Cards have been resolved, discard all the trauma tokens that were placed next to the Crossroads Cards as well as the trauma tokens on Ally Cards and on the "Brig" and "Sickbay." Remove all Ally Cards, ally tokens, and Crossroads Cards from the game. They will not be used for the remainder of the game.

2. **Reveal Trauma Tokens:** Each player reveals all of his trauma tokens. All human players (including unrevealed Cylons) discard all of their tokens with a benevolent symbol, while Cylon players discard all of their tokens with an antagonistic symbol.

3. **Discard Two or Fewer Trauma Tokens:** Each player with two or fewer remaining trauma tokens discards them as well.

4. **Total Remaining Trauma Tokens:** If no players have any remaining trauma tokens, proceed to step 6. However, if one or more players still have trauma tokens, each of those players determines the total number of tokens he has.

5. **Elimination:** The player who has the most trauma tokens remaining is eliminated from the game [see below]. Resolve ties for having the most trauma tokens in the following manner:

A. In the event of a tie among human players, the President chooses one of the human players tied for the most trauma tokens. That player is eliminated.

B. In the event of a tie among Cylon players, each tied Cylon player is eliminated.

C. In the event of a tie between human players and Cylon players, each tied Cylon player is eliminated. The tied human player is also eliminated. If more than one human player was tied, the President chooses which of the tied human players is eliminated.

6. **Discard Remaining Trauma Tokens:** After resolving player eliminations, return all trauma tokens to the box and resume normal game play from the point at which it was interrupted (or

from the beginning of the new current player's turn, if the previous current player was executed and/or eliminated during the Crossroads phase).

15.4.1.1 ELIMINATIONS

When eliminating a player, first resolve the execution of his character, including any loss of morale for executing a human. However, an eliminated human player does not choose a new character. Eliminated Cylon players do not move their characters to the "Resurrection Ship," but instead return their character sheets and tokens to the game box and discard any Super Crisis Cards they have. In either case, an eliminated player no longer receives a turn; he is out of the game completely. If he was the current player, the current player token is passed to the next player.

15.4.2 RESUMING THE GAME

Once the game has resumed, the next time the humans jump, they do not draw a Destination Card; instead, the End Game determines the winners [see rule 16. End game].

16. END GAME

16.1 ENDING THE GAME

The game can end in a number of different ways:

- If at least one resource (food, fuel, morale, or population) is depleted to 0 **at the end of a player's turn**, the game immediately ends and the Cylons win. Note that it is possible for the humans to reach 0 of a resource type and then increase it during the same turn without losing the game.
- If at least one centurion model reaches the end of the Boarding Party track, the game immediately ends and the Cylons win.
- If six or more locations on Galactica have damage tokens on them at the same time, then Galactica is destroyed and the Cylons immediately win.
- If a human is executed and there are no available characters left to be selected (although this is not very likely), then the humans immediately lose the game.
- If the Kobol Objective is in play and a final jump has been made after eight or more units of distance the humans **may** have won.
- If the New Caprica Objective is in play and the New Caprica phase is over, the humans **may** have won.
- If the Ionian Nebula Objective is in play and a final jump has been made after the Crossroads phase, the humans **may** have won.
- If the Earth Objective is in play and a final jump has been made after ten or more units of distance the humans **may** have won.

16.2 PERSONAL GOALS

If the humans may have won, all unrevealed Personal Goal Loyalty Cards have to be examined.

Each unrevealed Personal Goal Loyalty Card belonging to a human player at the end of the game reduces the resource listed on the card. If, after all the reductions, no resources have been reduced to 0, the humans win. If, however, any resource has been reduced to 0, then the victory goes to the Cylons.

If a revealed Cylon player has an unrevealed Personal Goal Card at the end of the game, do not reduce the resource listed on that card.

16.3 CYLON LEADER MOTIVE CARDS

Cylon Leader Motive Cards are finally assessed to determine victory for a Cylon Leader.

16.3.1 REVEALING MOTIVE CARDS DURING END GAME

Motive Cards that include the phrase, "Reveal this card if the game is over," cannot be revealed until after resources have been reduced for all unrevealed Personal Goal Loyalty Cards.

16.3.1.1 MOTIVE CARDS AFTER THE NEW CAPRICA PHASE

After the Admiral orders Galactica to leave, Motive Cards that include the phrase, "Reveal this card if the game is over", cannot be revealed until after players destroy all civilian ships on New Caprica and execute all human players on New Caprica.

16.3.2 WINNING AS A CYLON LEADER

A Cylon Leader wins along with the winning team if the following two conditions are met:

- At the end of the game, the Cylon Leader has no more than one Motive Card that he has not revealed.
- The Cylon Leader has revealed at least two Motive Cards with an allegiance that corresponds to the winning group, either humans or Cylons.
If two of the revealed Motive cards show human allegiances and two show Cylon allegiances, the Cylon Leader wins alongside either group.

16.4 ELIMINATED PLAYERS

Players eliminated during the Crossroads Phase are out of the game and have lost regardless of which team they were on.

ORIGINAL GAME CREDITS

The Core Battlestar Galactica Game and the Pegasus and Exodus Expansions were designed by Corey Konieczka, Daniel Lovat Clark, James Kniffen and Tim Uren and published by Christian T. Petersen and Fantasy Flight Publishing. The board game mechanics and rules are © Fantasy Flight Publishing.

“All of this has happened before. All of this will happen again.”
— Number Six

The Galactica-type battlestar is a Colonial capital ship that combines the functions of an aircraft carrier and a battleship. It was designed and deployed after the outbreak of hostilities between the Cylons and Colonials. A few ships of this class remain in service over 40 years after the end of the Cylon War; however, most were retired shortly after the War ended.
